

1911 LUG CUTTER COMPONENTS - 0.186" 1911 LUG CUTTER ONLY

[Gunsmith Tools & Supplies](#) > [Handgun Tools](#) > [Barrel Tools](#) > [Barrel Lug Tools](#)

A hand operated, carbide cutter easily trims excess material from the bottom barrel lug when fitting custom or factory barrels to 1911 autos. These cutters remove material from the barrel lugs in a parallel fashion, and with the correct height and radius, to help produce the best possible lockup. It is recommended to use the 0.186" cutter first, then progress to the 0.195" cutter if more material needs to be removed. Follow with careful hand fitting to achieve a firm, non-binding barrel-to-slide fit. Start small and check your work often. It is possible, with some slide/barrel combinations, that the 0.195" cutter could remove more material than necessary. Fits all 1911 Auto, Commander, Officer, single and double-stack frames. The 0.186" Lug Cutter, and 0.195" model are available with or without the handle. The handle is also available individually.

1911 LUG CUTTER COMPONENTS Safety Instruction Guide

Introduction

Thank you for choosing the 1911 Lug Cutter Components. This product is designed to assist in the precise trimming of excess material from the bottom barrel lug of 1911 autos. To ensure safe and effective use, please read and follow these safety instructions carefully.

General Safety Guidelines

- Always read the product manual before use.
- Ensure that the workspace is clean and free of distractions.
- Use the product only for its intended purpose as described in this guide.
- Keep the product out of reach of children and vulnerable individuals.
- Wear appropriate personal protective equipment (PPE), including safety glasses and gloves, when using the cutter.
- Regularly inspect the cutter for damage or wear. Do not use if damaged.

Specific Safety Precautions for Use

- Handle the cutter with care to avoid injury from sharp edges.
- Do not force the cutter. If it does not cut smoothly, stop and inspect for issues.
- Always use a stable surface when operating the cutter.
- Avoid using the cutter in wet or damp conditions.
- Store the cutter in a safe place when not in use to prevent accidents.

Instructions for Installation and Usage

1. Preparation:

- Ensure you have the appropriate cutter size for your project (0.186" or 0.195").
- Gather all necessary tools and materials before starting.

2. Using the Cutter:

- Position the barrel lug securely on a flat surface.
- Align the cutter with the barrel lug ensuring it is at the correct height and radius.
- Apply gentle, even pressure while cutting. Start with the 0.186" cutter before progressing to the 0.195" cutter if more material needs to be removed.
- Regularly check your work to ensure a firm, nonbinding fit between the barrel and slide.
- If using the cutter without a handle, ensure to grip it securely to maintain control.

3. PostUsage:

- Clean the cutter after use to remove any debris or material.
- Store the cutter in its designated place to prevent damage.

Disposal Instructions

- Dispose of the cutter responsibly according to local regulations.
- If the cutter is no longer usable, ensure that it is disposed of in a way that prevents injury to others.

Contact Information for Further Support

For any safety inquiries or further assistance, please refer to the manufacturer's website or customer service resources.

Thank you for following these safety instructions. Your safety is our priority. Enjoy using your 1911 Lug Cutter Components responsibly.
