## Allows Visual Inspection Of Hammer & Sear Engagement

For use with the Brownells Hammer/Sear Block, the machined steel block allows you to mate the hammer and sear (or trigger) outside of the firearm for a clear, unobstructed view of the critical point of engagement. These hammer and sear pins are sized for various handguns and rifles. Allen screw locks the pin setting so hammer and sear can be dropped in place relative to their actual position in the firearm. Great for cutting the engagement surfaces on new parts or fine-tuning the factory ones. Pins are individually numbered for proper identification.
