

BOLT LAPPING TOOLS - THREADED SLEEVE FOR REMINGTON 700 ONLY

[Gunsmith Tools & Supplies](#) > [Rifle Tools](#) > [Bolt Tools](#) > [Bolt Lapping Tools](#)

Interchangeable Design Gives Constant Spring Pressure For Precise Mating Of Locking Lug Recesses

Spring-loaded tool gives constant, straight-back pressure to keep bolt lugs square against the receiver while lapping with 600 to 800 grit, silicon carbide abrasive. Provides better results than mere thumb pressure. Interchangeable threaded sleeves fit popular actions listed below.

Safety Instruction Guide for BOLT LAPPING TOOLS THREADED SLEEVE FOR REMINGTON 700 ONLY

Introduction

Thank you for choosing the BOLT LAPPING TOOLS THREADED SLEEVE designed specifically for the Remington 700. This guide provides essential safety instructions to ensure the safe and effective use of this product. Please read all instructions carefully before use.

General Safety Guidelines

- Ensure that the tool is used only for its intended purpose as specified in this guide.
- Always wear appropriate personal protective equipment (PPE), including safety glasses and gloves, when using the tool.
- Keep the tool and its components out of reach of children and pets.
- Inspect the tool and its components for any signs of damage or wear before each use. Do not use if damaged.
- Store the tool in a dry, secure place when not in use to prevent accidental injury or damage.

Specific Safety Precautions for Use

- Always use the tool in a wellventilated area to avoid inhalation of dust from the abrasive materials.
- Do not exceed the recommended grit levels (600 to 800 grit) when lapping to prevent potential damage to the bolt or receiver.
- Ensure that the bolt lugs are square against the receiver during use to avoid misalignment and potential injury.
- Use the tool with caution; avoid applying excessive force which may lead to tool failure or personal injury.
- Follow all manufacturer instructions regarding the use of interchangeable threaded sleeves to ensure compatibility and safety.

Instructions for Installation and Usage

1. Preparation:

- Gather all necessary components: bolt tool body, plunger, and the correct size sleeve for your model.
- Ensure that you have the appropriate grit abrasive material ready for lapping.

2. Installation:

- Attach the correct size threaded sleeve to the bolt tool body by aligning the threads and turning clockwise until secure.
- Insert the plunger into the tool body, ensuring it fits snugly.

3. Usage:

- Place the bolt into the receiver and ensure it is properly seated.
- Apply the springloaded tool to the bolt, ensuring that it provides constant, straightback pressure against the bolt lugs.
- Begin lapping with the abrasive material, ensuring to maintain even pressure and avoid excessive force.

- Periodically check the alignment of the bolt lugs against the receiver during the lapping process.

4. PostUse:

- Once lapping is complete, carefully remove the tool and clean any residual abrasive material from the bolt and receiver.
- Inspect the tool and its components for any signs of wear or damage after use.

Disposal Instructions

- Dispose of any wornout or damaged components in accordance with local regulations.
- Ensure that any abrasive materials used during lapping are disposed of properly to prevent environmental contamination.

Contact Information for Further Support

For any inquiries regarding the safety and use of this product, please refer to the manufacturer's contact details provided with your purchase.

By following these safety instructions, you can ensure a safe and effective experience with your BOLT LAPPING TOOLS THREADED SLEEVE FOR REMINGTON 700 ONLY. Thank you for your attention to safety and enjoy your product!
