A Total Of 80 Precision, Economical, Good-Looking, Replacement Shotgun Beads

Brownells Shotgun Sight Kit "B" is the most important improvement in the replacement shotgun sight field since the introduction of the original Brownells Shotgun Sight Kit nearly 20 years ago. The new Kit is truly the natural and logical companion to the original Kit "A" - giving you, the gunsmithing or sports shop, all the sights that Kit "A" doesn't contain, but that you need to have a really versatile and complete replacement shotgun sight inventory in just 2 small boxes. Plus, in Kit "B", we took the practical step of making the White beads out of stainless steel. Stainless is stronger, won't crush or distort when the beads are installed, does not have to be removed when the gun goes into the hot bluing solution (and won't dissolve and ruin your bluing bath once it's in there)!! Plus, the stainless won't break off at the top of the shank, stays shiny forever, stands up to tougher use in the field, and generally is one whale of a lot better sight. But, the real advantage of Kit "B" is that by combining it with Kit "A", you can now have a selection of shank sizes unequaled among shotgun sights. So, if you get a gun in your shop with a badly misshapen, worn or stripped-out sight hole, you will have a bead of exactly the same size, but with a shank one size larger. Replacement is then just a simple matter of drilling out the hole to the next size larger, tapping, and inserting the new bead. The most important thing is that the Kit saves you time, giving faster work turnaround in the shop, which makes you more money. It also eliminates "patching-up" the original hole (which often then requires repairing the blue, too) and re-drilling and tapping for the original size shank. And, it gets your customer back in the field sooner which makes him happy, and makes you look good! Like the original Kit "A", the workmanship is superb, the sight globes are true spheres, the threads are cut onto the shank, so they are clean, sharp, and give the best possible fit. And, they are threaded right up to the base of the bead so you can set the sight exactly onto the barrel. Thread sizes are 6-48 and 8-40; certainly two of the most common and popular thread sizes in the gun industry, so everyone has the necessary drills and taps. The bead sizes are .067, .130 and .175, again the most popular sizes, and the same as those used in Kit "A". The Gold beads are machined from finest brass; the White beads from tough stainless steel. Because these are solid metal beads, they cannot bleed, chip, peel or have the color wear off. As the companion to Kit "A", Kit "B" also comes in a clear plastic counter case. Each individual sight number is in its own clearly identified box on a black tray. There are 10 sights of each number, giving you a total of 80 new sights. By itself, a complete inventory of 3 very popular sizes in 2 colors, with 6-48 and 8-40 shanks; but as a companion to Kit "A", an unbeatable assortment of the most versatile and useful shotgun sight beads available anywhere. And, right at your fingertips, ready to install for your customers. Order your Brownells Shotgun Sight Kit "B" today. Refill Sights for Kit "B" - Refills for the Shotgun Sight Kit "B" are single or 10-pak of sights of one number.

Safety Instruction Guide for SHOTGUN SIGHT KIT "B"

Introduction

Thank you for choosing the SHOTGUN SIGHT KIT "B". This product is designed to enhance your shotgun sight inventory, providing you with highquality replacement sights. Please read this safety instruction guide carefully to ensure safe and effective use of the product.

General Safety Guidelines

- Ensure that all safety instructions are followed to prevent accidents or injuries.
- Keep the product out of reach of children and vulnerable individuals.
- Inspect the product before use to ensure it is in good condition.
- Use the product only for its intended purpose as outlined in this guide.
- Report any unsafe products or accidents to the appropriate authorities.
- Stay informed about product recalls by checking the EU's Safety Gate platform.

Specific Safety Precautions for Use

- Handle all metal beads with care to avoid cuts or injuries.
- Always wear safety glasses when drilling or tapping to protect your eyes from metal shavings.
- Ensure that your workspace is clean and free from clutter to prevent accidents.
- Use the appropriate tools and techniques when installing or replacing sights to avoid damaging the firearm.
- Do not attempt to modify the product beyond the intended use as this may pose safety risks.

Instructions for Installation and Usage

1. Preparation:

- Gather all necessary tools: drills, taps, and the SHOTGUN SIGHT KIT "B".
- Ensure that the firearm is unloaded and in a safe condition before beginning work.

2. Replacement Process:

- Identify the size of the existing sight hole.
- Choose a bead from Kit "B" that matches the size needed, or select a larger shank size if the original hole is damaged.
- Carefully drill out the existing sight hole to the next size larger if necessary.
- Tap the hole to create threads for the new bead.
- Insert the new bead into the hole, ensuring it is secured properly.

3. PostInstallation:

- Check that the sight is aligned correctly and securely attached.
- Clean the area around the sight to remove any debris or metal shavings.
- Test the functionality of the sight before using the firearm.

Disposal Instructions

- Dispose of any metal shavings and packaging materials in accordance with local regulations.
- Do not throw the product in regular household waste. Instead, check for local recycling programs or

hazardous waste disposal options.

Contact Information for Further Support

For any safety inquiries or further assistance, please refer to the manufacturer's contact information provided with your product packaging.

Thank you for your attention to these safety instructions. By following these guidelines, you will ensure a safe and effective experience with your SHOTGUN SIGHT KIT "B".
