Puts Finish Polish On Shotgun Bores That Is Truly Outstanding

Hundreds of abrasive "balls" mounted on a flexible shaft - the fastest, easiest way we've come across to clean and polish older barrels or put a mirror polish in new ones. For used barrels, the Medium-Coarse hone, followed by the Fine, removes rough and tight spots and brings the bore to a bright finish that you can see and feel . . . just run a patch through it before and after; the difference is amazing! We found too, that we could feel tight spots during honing and spend extra time on them until they were evened out. On new barrels, the Fine hone by itself will bring the factory finish up to a beautiful, mirror-bright finish that's a real customer pleaser. Easy to use: chuck in a variable speed electric drill; wet the hone with Flex Hone® oil; start the drill and insert the hone into the barrel from the breech end (if possible). As it cuts, a slurry of abrasive and oil develops to help speed the cutting action. Flex Hone® available (shown below) in sets and individual hones for 10, 12, 16 and 20 gauge barrels as well as .410 bore. Also, special-sized hones for 10, 12, 16, 20 gauge chambers and .410 bore. Instructions walk you through the steps for a perfect job. (You MUST use Flex Hone® oil - all other oils will destroy the abrasive "balls" and void our guarantee!) 750 RPM MAX. Avoid excess pressure. SHOTGUN BARREL POLISHING FLEX HONE® 16 GAUGE FINE FLEX HONE, BORE Safety Instruction Guide

Introduction

Thank you for choosing the SHOTGUN BARREL POLISHING FLEX HONE® 16 GAUGE FINE FLEX HONE, BORE. This product is designed to help you clean and polish shotgun barrels efficiently. To ensure safe and effective use, please read and follow these safety instructions carefully.

General Safety Guidelines

- Always ensure you are using the product as intended.
- Keep the product out of reach of children and vulnerable individuals.
- Inspect the product for any damage before use, and do not use if damaged.
- Follow all instructions provided in this guide to avoid hazards.
- Report any unsafe conditions or accidents to the relevant authorities.
- Stay updated on any recall information by checking the EU's Safety Gate platform.

Specific Safety Precautions for Use

- Use only the recommended Flex Hone® oil. Other oils may damage the abrasive "balls" and void the guarantee.
- Avoid excessive pressure while using the hone to prevent damage to the barrel or the hone itself.
- Ensure your workspace is clean and free of hazards to prevent accidents.
- Wear appropriate personal protective equipment (PPE), such as safety goggles and gloves, to protect against debris and abrasives.
- Do not operate the drill without proper training or supervision if you are unfamiliar with power tools.

Instructions for Installation and Usage

1. Preparation:

- Gather all necessary materials, including the Flex Hone® and Flex Hone® oil.
- Ensure you have a variable speed electric drill available.

2. Using the Flex Hone®:

- Wet the hone with Flex Hone® oil before use.
- Insert the hone into the barrel from the breech end, if possible.
- Start the drill at a low speed (up to 750 RPM MAX).
- As the hone cuts, a slurry of abrasive and oil will form, aiding in the polishing process.
- Move the hone in and out of the barrel gently, avoiding excessive pressure.
- For used barrels, first use the MediumCoarse hone, followed by the Fine hone for optimal results.

3. PostUse Care:

- After honing, run a patch through the barrel to remove debris.
- Clean and store the Flex Hone® properly to maintain its condition for future use.

Disposal Instructions

- Dispose of any used or damaged Flex Hone® products in accordance with local waste disposal regulations.
- Avoid disposing of the product in general waste if it contains hazardous materials.

Contact Information for Further Support
