

REVOLVER RANGE RODS - BROWNELLS RREVOLVER RANGE OD COMBO FOR .45 AUTO/45 COLT

[Gunsmith Tools](#) > [Handgun Tools](#) > [Alignment Tools](#) > [Range Rods](#)

Tells Instantly If Barrel & Cylinder Are In Perfect Alignment-Match & Service Grade Available

Lets you know instantly if a revolver barrel and cylinder are in perfect alignment and if cylinder crane or yoke has been sprung, thus throwing axis of each out of line with axis of barrel bore . . . for timing - "accuracy jobs" . . . locating cause of lead splatter . . . professional service inspections. An excellent tool to use when demonstrating to a customer "why"! The handle with knurled grip end is threaded to take any of the interchangeable heads, with sizes carefully selected to indicate very small misalignments. The .38 caliber heads are available in two diameters, one for Match guns that must be dead on for best performance and one for Service guns which aren't always thoroughly clean and don't have to meet quite as fine an accuracy standard. And, there's a special head for the S&W K-22 which has a slightly undersized bore.

Safety Instruction Guide for REVOLVER RANGE RODS

Introduction

Thank you for choosing the REVOLVER RANGE RODS by BROWNELLS. This guide provides essential safety instructions, usage guidelines, and disposal instructions to ensure your safe and effective use of this product. Please read this guide carefully before using the product.

General Safety Guidelines

- Always use the REVOLVER RANGE RODS in a safe and controlled environment.
- Ensure that the revolver is unloaded before using the range rods.
- Keep the product out of reach of children and vulnerable individuals.
- Regularly inspect the range rods for any signs of damage or wear before use.
- Follow all local laws and regulations regarding the use of firearms and related tools.

Specific Safety Precautions for Use

- Ensure that the revolver barrel and cylinder are properly aligned before conducting any tests.
- Do not force the range rod into the revolver; if resistance is encountered, stop and check for misalignment.
- Use the correct head size for your specific revolver; using the wrong size may lead to inaccurate readings or damage.
- Avoid using the range rods in wet or damp conditions to prevent rust and degradation.
- Always wear appropriate eye protection when using the range rods, especially during demonstrations or inspections.

Instructions for Installation and Usage

1. Selecting the Head:

- Choose the appropriate head size for your revolver. The .38 caliber heads are available in two diameters:
 - Match guns (for best performance)
 - Service guns (for general use)
- For the S&W K22, use the specially designed head.

2. Attaching the Head:

- Take the selected head and align it with the threaded end of the handle.
- Twist the head onto the handle until securely fastened.

3. Using the Range Rod:

- Insert the range rod into the revolver barrel.
- Gently push the rod until it reaches the cylinder.
- Check for alignment by observing the fit and movement of the rod.
- If the rod does not fit properly, inspect the revolver for potential issues.

4. PostUse Care:

- After use, remove the range rod and clean it if necessary to remove any debris or residue.

- Store the range rods in a dry place, preferably in the fitted storage box provided.

Disposal Instructions

- Dispose of any damaged or worn range rods in accordance with local regulations.
- Do not dispose of the product in household waste. Instead, contact your local waste management authority for proper disposal methods.
- Ensure that all components are disposed of safely to prevent any potential hazards to the environment.

Contact Information for Further Support

For any safety inquiries or concerns regarding the use of the REVOLVER RANGE RODS, please refer to the EU-based contact point provided with your product packaging or on the manufacturer's website.

By following these guidelines, you can ensure safe and effective use of your REVOLVER RANGE RODS. Thank you for your attention to safety.
