

OLD FASHIONED WHITING - BROWNEllS OLD FASHIONED WHITING, 1LB

[Gunsmith Tools](#) > [Stock Work & Finishing](#) > [Stock Finish Strippers](#)

Quickly Draws Excess Oil Out Of Gun Stocks

Simple paint-it-on, brush-it-off process literally draws soaked-in grease and oils out of any oil-finished or oil-soaked gun stock. Especially useful on military stocks. Same method as described in the traditional gunsmithing books and just as effective now as then. Just make a thin paste of Whiting and methanol or TCE, acetone, or toluene and paint it onto the stock, then brush it off after it dries and darkens with oil. Warming gently speeds process. Repeat if needed; raise dents, sand and finish as usual.

Safety Instructions for OLD FASHIONED WHITING

Introduction

Thank you for choosing OLD FASHIONED WHITING by BROWNELLS. This product is designed to effectively remove grease and oils from oilfinished or oilsoaked gun stocks. Please read these safety instructions carefully to ensure safe and effective use.

General Safety Guidelines

- Always use this product in a wellventilated area to avoid inhaling fumes.
- Keep the product out of reach of children and pets.
- Wear appropriate personal protective equipment (PPE), such as gloves and safety goggles, during use.
- Avoid contact with skin and eyes. In case of contact, rinse immediately with plenty of water and seek medical advice if irritation persists.
- Do not ingest this product. If swallowed, seek medical attention immediately.
- Store the product in a cool, dry place away from direct sunlight and heat sources.
- Dispose of any unused product and containers in accordance with local regulations.

Specific Safety Precautions for Use

- Ensure that the surface to be treated is clean and dry before application.
- Do not apply the product near open flames or sparks, as it is flammable.
- Avoid breathing in vapors. If you experience dizziness or headaches, move to fresh air immediately.
- If using solvents such as methanol, TCE, acetone, or toluene, follow their safety instructions as well.
- Test the product on a small, inconspicuous area of the stock before full application to ensure compatibility.

Instructions for Installation and Usage

1. Preparation:

- Gather the necessary materials: OLD FASHIONED WHITING, a mixing container, a brush, and a suitable solvent (methanol, TCE, acetone, or toluene).

2. Mixing:

- Create a thin paste by mixing OLD FASHIONED WHITING with your chosen solvent in the mixing container. Ensure the consistency is suitable for application.

3. Application:

- Using the brush, apply the paste evenly onto the gun stock. Ensure complete coverage of the area needing treatment.
- Allow the paste to dry. The drying time may vary depending on environmental conditions.

4. Removal:

- Once the paste has dried and darkened with oil, gently brush it off the stock.
- If necessary, repeat the application process to achieve the desired results.

5. Final Touches:

- After the treatment, raise any dents, sand the surface, and finish as usual to restore the stock's appearance.

Disposal Instructions

- Dispose of any leftover paste and containers according to local regulations for hazardous waste.
- Do not pour any leftover product down the drain or in the environment.

Contact Information for Further Support

For any safety inquiries or further assistance regarding the use of OLD FASHIONED WHITING, please refer to the contact information provided on the product packaging or visit the manufacturer's website.

By following these safety instructions, you can ensure a safe and effective experience while using OLD FASHIONED WHITING. Thank you for your attention to safety!
