Fast, Positive Release Without Extra Bulk

Drop-in replacement for factory magazine catch has a unique, convex button surface to ensure positive finger contact for fast magazine changes under pressure. Crisp, 30 lpi serrations further aid in fumble-free engagement; .045" longer than factory part for extra leverage without creating an unwanted protrusion that snags on clothing, holster, or other gear. Tumbled and bead-blasted for a uniform, matte finish with rounded "dehorned" edges. Interior of the catch is relieved to enable instant magazine free-fall when you hit the button. Available in Carbon Steel with black manganese phosphate finish.
