B-G2S-E (Brownells / Geissele 2-Stage Enhanced) Don't Spend a Fortune! Available ONLY at Brownells Geissele and Brownells have teamed up to offer two unique triggers that give you the best performance at the best price! As one of the oldest and largest distributors of Geissele products, we had the unique opportunity to sit down with them to spec out two AR-15 triggers that wring out every bit of the performance Geissele is famous for. We also wanted to deliver them at a price point that won't make Geissele fans wait until a Black Friday sale to upgrade their current trigger! We found ways to reduce production costs on things that don't sacrifice the legendary Geissele trigger performance. So these triggers are not laser-engraved (which you can't see anyway when they're in the gun), and they're batch-tested rather than individually inspected. Rest assured, if for ANY reason you're not satisfied with your Brownells-exclusive Geissele trigger, it's still Guaranteed. Forever.® Simply return it to us for refund or exchange if it doesn't meet your expectations. Remember: you can't get these triggers anywhere else. They are available EXCLUSIVELY from Brownells! B-G2S-E The Geissele 2 Stage Enhanced Trigger (B-G2S-E) provides superior control and helps accuracy while maintaining the robustness and reliability that Geissele triggers are known for. The B-G2S-E gives a smooth, light 1st stage take up of 2.3lbs and a crisp, candy-cane-like 2nd stage break of 1.2lbs. The B-G2S-E is ideal for use in precision Squad Designated Marksman type rifles where weapon accuracy and reliability are critical. B-GRF (Geissele Rapid Fire) The Geissele Rapid Fire Trigger (B-GRF) was developed to give semiautomatic-only rifles a glass-smooth trigger pull very similar to the Geissele Super Select Fire (SSF) trigger designed for the U.S. Special Operations Community . The B-GRF is a fast-shooting, smooth trigger ideal for 3 Gun competition and recreational shooting alike. It pulls like a single-stage, but resets like a two-stage. Two trigger springs are included so the B-GRF can be set up with a pull of either 4 lbs or 3.2 lbs. Does NOT convert semiautomatic rifles to automatic. Note: The B-GRF trigger has a very short, light pull and reset. It is not recommended for bench rest shooting or shooting small groups. It is designed for CQB-style rapid target engagement and quick follow up shots.
