

# AR-15 TACTICAL REAR SIGHT 600 METER - KNIGHTS ARMAMENT

## AR-15 FLIP-UP ADJ TACTICAL REAR SIGHT 600 METER BLACK

[Rifle Parts](#) > [Sights](#) > [Rear Sights](#)

KAC's line of Micro Iron Sights are currently in use by the United States Army, Marine Corps and numerous law enforcement agencies worldwide. This is because they are built to exacting tolerances, maintain their zero under adverse conditions and, when folded, have one of the lowest profile top-rail footprints in the industry. The KAC 600 Meter Micro Rear Sight features a finger-adjustable, rotating drum that enables shooters to engage targets from 200 to 600 meters with both speed and accuracy. Zeroing Tips 300 Meter Rear Sights: Place a target 25 meters down range and fire a 3 round group(s). Adjust the front sight post and rear sight windage knob until the desired point-of-aim/point-of-impact is achieved. If possible, place a target 300 meters down range and confirm zero. Zeroing Tips 600 Meter Rear Sights: 25/300 Meter Zero: Place a target 25 meters down range. Turn the rear sight drum to the "Z" setting and fire a 3 round group(s). Adjust the front sight post and rear sight windage knob until the desired point-of-aim/point-of-impact is achieved. If possible, turn the rear sight drum to the "3" setting and confirm zero at 300 meters. 50/200 Meter Zero: Place a target 50 meters down range. Turn the rear sight drum to the "2" setting and fire a 3 round group(s). Adjust the front sight post and rear sight windage knob until the desired point-of-aim/point-of-impact is achieved. If possible, place a target 200 meters down range and confirm zero.

NOTE: Once zeroed by one of the above methods, the rear sight's 200, 300, 400, 500, and 600 meter range marks may be used for engaging targets at those distances. However, because the range markings are averaged between rifle and carbine barrel lengths, the exact point-of-aim/point-of-impact sight settings may differ a click or two for a given rifle. If possible, fire your rifle at known distances and record your exact + or - clicks for each range. The rear sight's intermediate clicks between major range markings may also be used to engage targets at ranges such as 250 meters, 375 meters, etc.

### Attributes

- Name: [KNIGHTS ARMAMENT AR-15 FLIP-UP ADJ TACTICAL REAR SIGHT 600 METER BLACK](#)
- Manufacturer: [KNIGHTS ARMAMENT](#)
- Product no.: 100015207
- Mfr. No.: 98474
- Colour: Black
- Style: Adjustable,Flip-Up
- Weapon type: AR-15
- Delivery weight: 0.095kg
- Shipping height: 61mm
- Shipping width: 61mm
- Shipping length: 97mm
- UPC: 819064010494

# Safety Instruction Guide for AR15 Tactical Rear Sight 600 Meter

## Introduction

Thank you for choosing the AR15 Tactical Rear Sight 600 Meter by Knights Armament. This guide provides important safety instructions, installation tips, and usage guidelines to ensure safe and effective operation of your rear sight. Please read this manual carefully before using the product.

## General Safety Guidelines

- Ensure that the product is used in accordance with all relevant laws and regulations.
- Always inspect the rear sight and firearm for any damage or wear before use.
- Keep the rear sight and firearm out of reach of children and unauthorized users.
- Use only compatible ammunition as specified by the manufacturer.
- Always treat every firearm as if it is loaded, even if you believe it is not.
- Follow all standard firearm safety practices, including keeping the muzzle pointed in a safe direction and keeping your finger off the trigger until ready to shoot.

## Specific Safety Precautions for Use

- When adjusting the rear sight, do so in a safe environment where no one is in the line of fire.
- Ensure that the target area is clear of people, animals, and obstructions before firing.
- Be aware of your surroundings and ensure that you have a proper backstop when shooting.
- Use eye and ear protection while using the firearm equipped with the rear sight.
- Do not attempt to modify or disassemble the rear sight beyond the manufacturer's instructions.

## Instructions for Installation and Usage

### Installation

1. **Preparation:** Ensure that the firearm is unloaded and pointed in a safe direction.
2. **Mounting the Sight:**
  - Align the rear sight with the Picatinny rail on your AR15.
  - Secure the sight using the appropriate mounting hardware provided.
  - Tighten the screws firmly, but do not overtighten to avoid damaging the sight or rail.
3. **Adjusting the Sight:**
  - Use the fingeradjustable rotating drum to set the desired range.
  - For zeroing, follow the zeroing tips provided in the product description.

### Usage

- **Zeroing the Sight:**
  - For 300 Meter Zero: Place a target 25 meters downrange. Fire a 3round group and adjust the front sight post and rear sight windage knob until the desired pointofaim/pointofimpact is achieved. Confirm zero at 300 meters if possible.
  - For 600 Meter Zero:
    - 25/300 Meter Zero: Set the rear sight drum to "Z" and follow the same procedure as above.
    - 50/200 Meter Zero: Place a target 50 meters downrange, set the rear sight drum to "2", and confirm zero at 200 meters if possible.

## **Disposal Instructions**

- Dispose of the rear sight in accordance with local regulations regarding electronic and metal waste.
- Do not dispose of the product in regular household waste.
- If the product is damaged or no longer in use, consider returning it to the manufacturer for proper disposal.

## **Contact Information for Further Support**

For any safety inquiries or further assistance regarding the AR15 Tactical Rear Sight, please refer to the manufacturer's contact information provided with your product.

## **Conclusion**

By following these safety instructions and guidelines, you can ensure the safe and effective use of your AR15 Tactical Rear Sight 600 Meter. Always prioritize safety and responsible handling of your firearm. Thank you for your attention to these important safety practices.
