

308 AR BARREL CARBON FIBER 6.5 CREEDMOOR 1-8 TWIST - BSF BARRELS 24 IN BARREL 6.5 CREEDMOOR CARBON FIBER RIFLE +2 GAS SYSTEM

[Rifle Parts](#) > [Barrel Parts](#) > [Rifle Barrels](#)

Impressive Accuracy From a Lightweight, Futuristic-Looking Barrel

BSF builds their match-grade carbon fiber barrels with exceptional attention to detail that ensures you'll achieve the best possible accuracy from your 6.5 Creedmoor AR-pattern rifle without getting a hernia lugging it around! BSF 6.5 Creedmoor barrels are turned from ordnance-grade 416R stainless steel, then given a roll-wrapped, tensioned, carbon fiber sleeve. The sleeve keeps weight down while providing excellent rigidity, coupled with enhanced cooling. Why the sleeve method, rather than simple carbon fiber wrapping? The BSF folks believe wrapping traps heat and, as a result, is more likely to delaminate. Further, BSF uses a special carbon fiber that expands at the same rate as the 416R, and holes drilled into the jacket allow air to circulate around the barrel and vent heat quickly. Less heat distortion means far less risk of accuracy fade as your 6.5 Creedmoor chambered AR-15's barrel heats up. Fits .308 sized AR upper receiver 6 Groove button-rifled 5/8"-24 tpi muzzle threads .875" O.D. Barrel extension included BSF offers their 6.5 Creedmoor carbon fiber match barrels with a 1-8" rifling twist effectively stabilizes that widest variety of popular bullet weights. And each barrel is thoroughly inspected by an experienced technician before leaving the BSR shop, ensuring you get a barrel that's as accurate as it is good looking!

Attributes

- Name: [BSF BARRELS 24 IN BARREL 6.5 CREEDMOOR CARBON FIBER RIFLE +2 GAS SYSTEM](#)
- Manufacturer: [BSF BARRELS](#)
- Product no.: 100026800
- Mfr. No.: FR1024C005
- Cartridge: 6.5 Creedmoor
- Contour: Medium
- Finish: Carbon Fiber
- Gas System Length: Rifle +2
- Length: 24"
- Muzzle Threads: 5/8-24
- Twist: 1-8
- Weapon type: AR .308
- Delivery weight: 1.497kg
- Shipping height: 102mm
- Shipping width: 102mm
- Shipping length: 711mm

Safety Instruction Guide for 308 AR Barrel Carbon Fiber 6.5 Creedmoor

Introduction

Thank you for choosing the 308 AR Barrel Carbon Fiber 6.5 Creedmoor. This product is designed to enhance your shooting experience while ensuring safety and compliance with the EU General Product Safety Regulation (GPSR). Please read this guide thoroughly to understand the safe use, installation, and maintenance of your barrel.

General Safety Guidelines

- Always handle firearms with care and follow the basic rules of firearm safety.
- Ensure that the barrel is installed correctly and securely before use.
- Regularly inspect the barrel for any signs of wear or damage before each use.
- Use only .308 sized AR upper receivers compatible with this barrel.
- Ensure you are using the correct ammunition (6.5 Creedmoor) for your firearm.
- Keep the barrel and firearm out of reach of children and unauthorized users.
- Report any unsafe products or accidents to the relevant authorities.
- Check for recall updates on the EU's Safety Gate platform.

Specific Safety Precautions for Use

- **Heat Management:** The carbon fiber sleeve is designed to reduce heat distortion. However, avoid prolonged firing sessions without allowing the barrel to cool down.
- **Correct Ammunition:** Only use highquality, compatible ammunition to prevent malfunctions and ensure safety.
- **Inspection:** Before each use, inspect the barrel and ensure there are no obstructions in the bore.
- **Proper Handling:** Always treat the firearm as if it is loaded. Keep the muzzle pointed in a safe direction at all times.
- **Storage:** Store the barrel and firearm in a secure location, preferably in a locked safe, to prevent unauthorized access.

Instructions for Installation and Usage

1. Installation:

- Ensure your workspace is clean and free of distractions.
- Gather all necessary tools for installation, including a torque wrench.
- Remove the existing barrel from your AR upper receiver following the manufacturer's instructions.
- Align the new 308 AR Barrel Carbon Fiber 6.5 Creedmoor with the receiver and secure it using the provided barrel extension.
- Tighten the barrel to the manufacturer's specifications using a torque wrench to ensure it is properly secured.
- Check the muzzle threads (5/8"24 tpi) to ensure they are clean and free of debris before attaching any muzzle devices.

2. Usage:

- Once installed, ensure the firearm is in a safe condition before loading.
- Load the firearm only when ready to shoot.
- After firing, allow the barrel to cool before cleaning or inspecting.

Disposal Instructions

- Dispose of the barrel in accordance with local regulations.
- Do not dispose of the barrel in regular household waste.
- Contact your local waste management facility for proper disposal methods.

Contact Information for Further Support

For safety inquiries or further support regarding this product, please refer to the official manufacturer's website or your point of purchase.

Thank you for your attention to these safety instructions. Enjoy your shooting experience with the 308 AR Barrel Carbon Fiber 6.5 Creedmoor!
