An Aftermarket Barrel for Your Savage Model 110

Looking to change out the barrel on your Savage Model 110 rifle action? Thanks to International Barrels, changing out your rifle's barrel doesn't have to involve a trip to the gunsmith! The specially developed design of these Savage small-shank pre-fit barrels means you can swap out your rifle caliber right at home. Each International Barrels Pre-Fit Savage Small Shank precision barrel is constructed with a barrel-nut system that can be threaded onto your action right at home. Once the barrel is threaded into place, simply check its positioning with a set of headspace gauges and then tighten the barrel nut down to its proper torque settings. Then you're done! The easy attachment system of these International Barrels Pre-Fit Barrels isn't all you're getting. These gun barrels are button-rifled and are made to precision tolerances, double-checked at every step along the way. The barrels are made using the company's Medium contour, which features a straight taper from the breech to the muzzle. Each barrel is threaded with 5/8-24 TPI muzzle threads. The company warns that some stocks may need to be inlet to allow clearance for the barrel nut.
