An Improved Precision Barrel for Your Remington 700

Have a Remington 700 that you're looking to re-barrel? Whether you've got a worn-out factory barrel or want a new caliber, changing out a Remington 700 barrel always meant a trip to the gunsmith, but those days are gone! Thanks to the International Barrels Pre-Fit Barrel System, you can perform the same barrel-change job safely and easily at home. Each International Barrels Pre-Fit Remington 700 pre-fit precision barrel is constructed with a barrel-nut system that can be threaded onto your action right at home. Once the barrel is threaded into place, simply check its positioning with a set of headspace gauges and then tighten the barrel nut down to its proper torque settings. Then you're done! The easy attachment system of these International Barrels Pre-Fit Barrels isn't all you're getting. These gun barrels are button-rifled and are made to precision tolerances, double-checked at every step along the way. The barrels are made using the company's Medium contour, which features a straight taper from the breech to the muzzle. Each barrel is threaded with 5/8-24 TPI muzzle threads. The company warns that some stocks may need to be inlet to allow clearance for the barrel nut.

SAFETY INSTRUCTIONS

Introduction

Thank you for choosing the REMINGTON 700 Prefit Precision Barrels. This guide provides essential safety information and instructions to ensure the safe use and installation of your new barrel. Please read this manual carefully before use.

General Safety Guidelines

- Always treat firearms and firearm components as if they are loaded.
- Ensure that you are in a safe environment when handling or installing the barrel.
- Keep the barrel and all firearm components out of reach of children and unauthorized users.
- Use personal protective equipment (PPE) such as eye protection when working with firearms.
- Be aware of your surroundings and ensure that no one is in the vicinity when performing any installation or maintenance.
- Regularly inspect the barrel for any signs of damage or wear before use.
- Follow all local laws and regulations regarding firearms and firearm components.

Specific Safety Precautions for Use

- Ensure that the firearm is completely unloaded before beginning any installation or maintenance work.
- Only use ammunition that is compatible with the 6.5 Creedmoor cartridge.
- Be cautious when handling tools and equipment during installation.
- If you experience any difficulty during installation, stop and seek assistance from a qualified gunsmith.
- Do not modify the barrel or firearm components in any way that could compromise safety.
- Check for proper headspace using appropriate gauges before tightening the barrel nut.
- Ensure that the barrel nut is tightened to the manufacturer's specified torque settings.

Instructions for Installation and Usage

1. Preparation

- Gather all necessary tools: barrel nut wrench, headspace gauges, and torque wrench.
- Ensure a clean and organized workspace.

2. Removing the Old Barrel

- Unload the firearm and ensure it is safe to handle.
- Remove the action from the stock according to the manufacturer's instructions.
- Use a barrel nut wrench to remove the existing barrel.

3. Installing the New Barrel

- Thread the REMINGTON 700 Prefit Precision Barrel onto the action.
- Check the alignment and positioning using headspace gauges.
- Once the proper alignment is confirmed, tighten the barrel nut to the specified torque settings.

4. Final Checks

- Inspect the installation to ensure that everything is secure and correctly aligned.
- Reinstall the action into the stock following the manufacturer's guidelines.

- Conduct a final safety check to ensure the firearm is functioning correctly.

5. Usage

- When using the firearm, follow all standard firearm safety protocols.
- Regularly check the barrel for any signs of wear or damage.

Disposal Instructions

- Dispose of any packaging materials in accordance with local waste disposal regulations.
- If the barrel is damaged or no longer in use, consult your local waste management guidelines for safe disposal of firearm components.
