

MODBUTTON LITE LIGHT SWITCH - MODLITE SYSTEMS SUREFIRE 7" MODBUTTON, BLACK

[Shooting Accessories](#) > [Flashlights & Accessories](#) > [Flashlight Accessories](#)

ModButton Lite is a smaller lighter weight cousin to the original ModButton. The switch features the same momentary only activation as the original ModButton. It also features the same high-power cable and switch from ModButton but in a slightly smaller package without the integrated mount. The switch is made from injection molded plastic and fully potted to provide extra degree of protection in harsh environments and ensures a durable long-lasting switch. ModButton Lite utilizes a patented Unity Tactical design which supports power delivery needed by the next generation of high output weapon lights like Modlite. A Unity built Surefire® compatible cable lead allows ModButton Lite to be backwardly compatible with all Surefire®, Arisaka and Modlite Scout bodies as well as Surefire UE and DS00 tail caps. If constant on is a requirement Modlite recommends using a SF DS00 tail cap. One problem that exists today is older legacy switches are not able to pass the current needed to run current and future generation lights. These older switch designs do not allow Modlite light heads to run at full power. Typically, these switches reduce output by 15-20%. ModButton Lite utilizes an updated plug design as well as improved electronics that allow the ModButton Lite to output at full power so all the lumens and candela can be put to good use. The package includes the switch PIC mounting rails and mounting hardware only no tail cap is supplied. Modlite recommends the Surefire UE or DS00 tail caps. Made in the USA Weight: 1.8oz Dimensions: 1.0 × 3.8 × 5.7 in Mounting Side: Left or Right Color: Black or Tan

MODBUTTON LITE LIGHT SWITCH SAFETY INSTRUCTIONS

Introduction

Thank you for choosing the ModButton Lite Light Switch from Modlite Systems. This guide provides important safety information and instructions for the proper use and care of the product. Please read this manual carefully before using the ModButton Lite to ensure safe operation and compliance with the EU General Product Safety Regulation (GPSR).

General Safety Guidelines

- Always ensure the ModButton Lite is used in accordance with the manufacturer's instructions.
- Keep the ModButton Lite out of reach of children and vulnerable individuals.
- Inspect the product regularly for any signs of damage or wear. If damaged, discontinue use immediately.
- Do not expose the ModButton Lite to extreme temperatures, moisture, or corrosive substances.
- Use only compatible components and accessories as recommended by Modlite Systems.
- Report any unsafe conditions or incidents to the appropriate authorities.

Specific Safety Precautions for Use

- **Electrical Safety:** Ensure that the ModButton Lite is installed properly to avoid electrical hazards. Follow all electrical safety guidelines.
- **Compatibility:** Use the ModButton Lite only with devices specified in the product description. Incompatible devices may cause malfunction or damage.
- **Installation Location:** Install the ModButton Lite in a location that does not obstruct its operation or create safety hazards.
- **Power Supply:** Ensure that the power supply meets the requirements of the ModButton Lite. Using an inadequate power supply may lead to performance issues.
- **Momentary Activation:** The ModButton Lite features momentary activation. Be cautious when using this feature to avoid accidental activation.

Instructions for Installation and Usage

1. Installation:

- Select a suitable mounting location for the ModButton Lite.
- Use the provided mounting hardware to securely attach the switch to the desired surface.
- Ensure that the switch is mounted in a way that allows easy access and operation.

2. Wiring:

- Connect the ModButton Lite to the compatible light system using the provided cable.
- Follow the wiring diagram included in the product packaging for correct installation.
- Ensure all connections are secure and insulated to prevent electrical shorts.

3. Usage:

- To activate the ModButton Lite, press the switch momentarily. Release to deactivate.
- For constant functionality, use a compatible tail cap as recommended by Modlite Systems.
- Regularly check the functionality of the switch to ensure proper operation.

Disposal Instructions

- Dispose of the ModButton Lite in accordance with local regulations regarding electronic waste.
- Do not dispose of the product in household waste. Instead, take it to a designated recycling center for electronic devices.
- Remove any batteries or power sources before disposal, following local guidelines for battery disposal.

Contact Information for Further Support

For any questions or concerns regarding the ModButton Lite, please refer to the manufacturer's website or contact the appropriate customer service channels provided with your purchase.

By following these safety instructions, you can ensure the safe and effective use of your ModButton Lite Light Switch. Thank you for your attention to these important guidelines. Enjoy your product responsibly!
