

**SUPER DUTY RIFLE 14.5 5.56MM - SUPER DUTY 5.56MM 14.5" BBL
PINNED LUNA BLACK**

The Super Duty Rifle features the latest in weapon technology available exclusively from Geissele Automatics. This 14.5" rifle chambered in 5.56mm features a Nanoweapon coated Surefire Closed-Tine Warcomp Pinned and Welded to an in-house 14.5" Black Oxide Cold Hammer Forge, Chrome Lined, 1-7 twist Geissele barrel. Our barrels are precision machined and cold hammer forged utilizing the highest quality materials at our state of the art facility in North Wales, PA. The Super Mid-length gas system and Geissele Super Compact Gas Block (with bomb-proof installation) ensures reliability and optimal performance in extreme conditions and heavy use. Exclusive to the Super Duty 14.5" Rifle is the brand new SSA-E X with Lighting Bow trigger. This nanocoated, two-stage trigger features a wide body and bow shape that finds the perfect balance between a classic M4 trigger and a flat body trigger. At the heart of this rifle is the Geissele REBCG (Reliability Enhanced Bolt Carrier Group). This Nanoweapon coated BCG is machined from mil-spec 8620 steel, with a properly torqued and staked, chrome lined gas key. The Cam Pin is machined from advanced, medical steel known as H13 which is also coated with Nanoweapon for maximum corrosion and wear resistance. The REBCG also features extended upper rails, providing greater stability and dramatically increasing feeding reliability. The REBCG comes with the Geissele Stressproof Bolt. Made from Carpenter 158+, directly developed with Carpenter Steel metallurgists to create a material that is cleaner and has less impurities. This makes our Stressproof bolt stronger and more fatigue resistant. The Geissele Stressproof bolt is also forged, not machined from barstock. This allows us to optimize the grain structure of the steel to yield a bolt capable of 5 times the life of a mil-spec bolt. Each bolt is rigorously inspected, high pressure tested, mag particle inspected and Nanoweapon coated. The Super Duty lower is precision machined from 7075-T6 aluminum and features Geissele's Ultra Duty Lower Parts Kit featuring our Ambidextrous Super Configurable safety and Ultra Precision trigger guard. A high quality mil-spec Geissele Buffer Tube with a Super-42 in H2 buffer ensures this rifle is properly tuned out of the box. Rounding up the package is a 13.5" MK16 Super Modular Rail, that mates to the Super Duty Upper Receiver via a center aligning tab that removes any chance of rail rotation. The MK16 family of rails are fielded by USASOC and renowned by operators for their performance and comfort. An Airborne Charging Handle, ensure smooth and reliable operation. A Geissele Rifle Grip and a B5 Systems Enhanced Sopmod Stock finalizes this high-end rifle that offers the user unmatched accuracy and performance. What is Geissele Nanoweapon? Geissele Nanoweapon (also known as Picatinny DSL) is a family of Durable Solid Lubricant coatings which was developed by ARDEC. It is available exclusively from Geissele Automatics. We continued the development of Picatinny DSL so that its level of corrosion, wear and abrasion resistance is currently unmatched among firearm coatings. Nanoweapon is applied at low temperatures so that the underlying metallurgy of the part is non effected by the application process. Our coating also has a surface hardness roughly equivalent to synthetic diamond. This makes Geissele Nanoweapon harder than sand, easily rejecting carbon and making cleaning a breeze, on top of allowing the firearm to operate normally with less lubrication. What is Luna Black? Luna Black is a glossy, deep black color that is available as an option for Super Duty Rifles and Super Duty Uppers. Being Type 3 Hardcoat Anodize Luna Black is durable and long lasting. This premium finish ensures your high-end build stands among others. THIS RIFLE DOES NOT SHIP WITH A MAGAZINE LENGTH: 14.5" CALIBER: 5.56MM LOWER RECEIVER: Super Duty Lower Mil-Spec UPPER RECEIVER: Super Duty M4 Upper BCG: REBCG (Reliability Enhanced Bolt Carrier Group) BOLT: Geissele Stressproof Bolt RAIL 13.5" SMR MK16 w/ Geissele Center Tab TRIGGER: SSA-E X w/ Lighting Bow BARREL: 14.5" Barrel, CHF, Chrome Lined, 1-7 Twist (Pin & Weld) GAS SYSTEM: Mid-Length GAS BLOCK: Super Compact Gas Block CHARGING HANDLE: Airborne Charging Handle MUZZLE: Nanocoated Surefire Closed-Tine Warcomp BUFFER: Mil-Spec 6 Position, 7075-T6 BUFFER ASSEMBLY: Super-42 w/ H2 Buffer STOCK: B5 Systems Enhanced Sopmod Stock GRIP: Geissele Rifle Grip LOWER PARTS KIT: Ultra Duty Lower Parts Kit

Geissele firearms feature a Type 3 harcoat anodized finished. This includes the color variants, such as DDC, ODG and 40mm Green. Due to the nature of hard anodizing, the color variants will illustrate different shades. The color will also highlight imperfections in aluminum, where black anodizing hides it. If purchasing a color variant, please expect some variation in the finish from part to part and the potential for minor cosmetic imperfections in the aluminum.
