

# CARBIDE SLITTING SAW - EGW 15° SLITTING SAW

[Gunsmith Tools](#) > [Power Tools & Accessories](#) > [Carbide Slitting Saws](#)

## Production Quality For Fast, Accurate, Slide Enhancement

High-quality, solid-carbide slitting saw cuts accurate, great-looking, cocking serrations on hardened 1911 Auto slides without dulling. Square saw matches cocking serrations on STI, EntrZprise, McCormick, Gold Cup and Caspian slides. 15° angle saw cuts 1911A1 Government cocking serrations. Use 60° included angle saw to layout checkering lines; make French Cuts along top of slide. For best results, use with the 1911 Auto Gunsmith Plate sold elsewhere.

# CARBIDE SLITTING SAW EGW 15° SLITTING SAW Safety Instruction Guide

## Introduction

Thank you for choosing the CARBIDE SLITTING SAW EGW 15° SLITTING SAW. This product is designed for precision cutting of cocking serrations on hardened 1911 Auto slides. To ensure safe and effective use of this tool, please read and follow the safety instructions outlined in this guide.

## General Safety Guidelines

- Ensure that the workspace is clean and free from clutter to prevent accidents.
- Always wear appropriate personal protective equipment (PPE), including safety glasses, gloves, and ear protection.
- Keep the slitting saw and all cutting tools out of reach of children and unauthorized users.
- Do not use the slitting saw for any purposes other than those specified in this guide.
- Regularly inspect the slitting saw for any signs of damage or wear before use.
- In case of any malfunction or unusual operation, stop using the tool immediately and consult a qualified technician.

## Specific Safety Precautions for Use

- **Hazard Identification:** The slitting saw can pose risks such as cuts, lacerations, and eye injuries if not handled properly.
- **Avoiding Hazards:**
  - Always ensure the saw is securely mounted before operation.
  - Do not reach over the saw blade while it is in motion.
  - Never attempt to clear debris from the cutting area while the saw is running.
  - Ensure that the workpiece is firmly secured to prevent movement during cutting.
  - Do not wear loose clothing or jewelry that could become caught in the saw.

## Instructions for Installation and Usage

### • Installation:

1. Secure the slitting saw to the appropriate arbor (1/2" / 12.7mm) on your cutting machine.
2. Ensure the saw is tightened properly to prevent slippage during use.
3. Check that the saw is aligned correctly and is not wobbling.

### • Usage:

1. Set the machine to the recommended feed rate of 4" per minute at 610 RPM for optimal cutting performance.
2. Use the saw at a 15° angle for cutting 1911A1 Government cocking serrations.
3. For layout checkering lines, utilize a 60° included angle saw.
4. Always maintain a safe distance from the cutting area and keep hands clear of the blade.

## Disposal Instructions

- Dispose of the slitting saw according to local regulations for solid carbide materials.
- Ensure that the saw is not usable before disposal to prevent accidents.
- Consider recycling options for carbide materials where available.

## Contact Information for Further Support

For any inquiries related to safety, usage, or product support, please reach out to the appropriate customer service channels available in your region.

By following these safety guidelines and instructions, you can ensure a safe and effective experience with the CARBIDE SLITTING SAW EGW 15° SLITTING SAW. Always prioritize safety and do not hesitate to seek assistance if needed. Thank you for your attention to these important safety measures.
