

# CARBIDE SLITTING SAW - EGW 60° SLITTING SAW

[Gunsmith Tools](#) > [Power Tools & Accessories](#) > [Carbide Slitting Saws](#)

## Production Quality For Fast, Accurate, Slide Enhancement

High-quality, solid-carbide slitting saw cuts accurate, great-looking, cocking serrations on hardened 1911 Auto slides without dulling. Square saw matches cocking serrations on STI, EntrZprise, McCormick, Gold Cup and Caspian slides. 15° angle saw cuts 1911A1 Government cocking serrations. Use 60° included angle saw to layout checkering lines; make French Cuts along top of slide. For best results, use with the 1911 Auto Gunsmith Plate sold elsewhere.

# CARBIDE SLITTING SAW EGW 60° SLITTING SAW

## Safety Instruction Guide

### Introduction

Thank you for choosing the CARBIDE SLITTING SAW EGW 60° SLITTING SAW. This guide provides essential safety instructions to ensure proper usage and to minimize risks associated with the operation of this cutting tool. Please read this guide thoroughly before use.

### General Safety Guidelines

- Always wear appropriate personal protective equipment (PPE) when operating the slitting saw, including safety glasses, gloves, and hearing protection.
- Ensure that the workspace is clean and free of obstructions to prevent accidents.
- Keep the slitting saw out of reach of children and unauthorized personnel.
- Regularly inspect the slitting saw for any signs of wear or damage before use.
- Follow all local regulations and guidelines related to the use of cutting tools.

### Specific Safety Precautions for Use

- Use the slitting saw only for its intended purpose: cutting cocking serrations on hardened 1911 Auto slides and layout checkering lines.
- Ensure that the material being cut is securely clamped to prevent movement during cutting.
- Do not force the saw; allow it to cut at its designed feed rate (4 inches per minute at 610 RPM for 4140 CM at 42 Rc).
- Avoid wearing loose clothing or jewelry that could become caught in the saw during operation.
- Do not operate the saw if you are tired, under the influence of drugs or alcohol, or if you are not feeling well.
- In the event of a malfunction or unusual operation, stop using the saw immediately and seek assistance.

### Instructions for Installation and Usage

#### 1. Installation:

- Ensure that the saw is compatible with your equipment before installation.
- Secure the saw onto the arbor ( $\frac{1}{2}$ " / 12.7mm) following the manufacturer's instructions.
- Verify that all connections are tight and that the saw is properly aligned.

#### 2. Usage:

- Set the machine to the appropriate RPM (610 RPM recommended).
- Start the machine and allow it to reach full speed before beginning to cut.
- Maintain a steady feed rate of 4 inches per minute to avoid overheating and dulling the saw.
- For layout checkering lines, use the 60° included angle saw as specified.
- After cutting, turn off the machine and allow the saw to come to a complete stop before removing any material.

### Disposal Instructions

- Dispose of the slitting saw in accordance with local regulations for hazardous waste.
- If the saw is damaged or no longer usable, consider recycling options for solid carbide materials.

## **Contact Information for Further Support**

For any safety inquiries or concerns, please refer to the manufacturer's contact information provided separately. Always ensure that you have the latest safety updates and product information.

By adhering to these safety guidelines and instructions, you can ensure a safer working environment and maximize the performance of your CARBIDE SLITTING SAW EGW 60° SLITTING SAW. Thank you for prioritizing safety in your operations.
