

M1A SOCOM II QUICK DETACH SCOPE MOUNT - GG&G M1A SOCOM II QD SCOPE MOUNT

[Optics & Mounting](#) > [Rings, Mounts & Bases](#) > [Mount Sets](#)

The SOCOM II M1A Rifle is a compact, powerful close quarter combat battle rifle. However its "Cluster Rail" system makes it difficult to mount a conventional low powered scope. You have to install an additional receiver mounted scope base to the SOCOM II along with a set of scope rings that are tall enough so that the objective lens clears the top rail. If you want Quick Detach capability, you need to mount your scope on top of the receiver mounted scope base with some type of QD mount and ring combo. We think that's a PIA and has too many interface points that could negatively affect the zero retention of your scope. The New Products Team at GG&G has come up with an innovative solution---The SOCOM II Accucam Quick Detach Scope Mount With 30mm Integral Rings: The Accucam Quick Detach System provides quick and easy on-off transitions while maintaining 1/2 MOA accuracy. Accucam QD System is fully adjustable to fit worn or out of spec dovetails. The SOCOM II Accucam Quick Detach Scope Mount has dual recoil lugs that interface with the recoil slots of the top dovetail rail to provide secure recoil resistance. The scope mount has 30mm integral rings with four cap screws per ring. Each cap screw threads into stainless steel helicoils. The cantilever feature of the SOCOM II Scope Base overhangs 3" to allow for additional forward/rearward adjustment for scopes with different eye reliefs. The underside of the SOCOM II QD Scope Mount is relief cut for unimpeded cartridge ejection.

M1A SOCOM II Quick Detach Scope Mount Safety Instructions

Introduction

Thank you for purchasing the M1A SOCOM II Quick Detach Scope Mount by GG&G. This product is designed to enhance your shooting experience by providing a reliable and secure mounting solution for your scope. To ensure safe and effective use of this product, please read and follow the safety instructions outlined in this guide.

General Safety Guidelines

- Always ensure that the firearm is unloaded before installing or adjusting the scope mount.
- Use the scope mount only for its intended purpose as outlined in this manual.
- Regularly inspect the scope mount for any signs of wear or damage.
- Store the scope mount in a cool, dry place away from direct sunlight and moisture.
- Keep the scope mount and all related components out of reach of children and unauthorized users.
- If you experience any issues with the scope mount, discontinue use and seek assistance.

Specific Safety Precautions for Use

- Ensure that the scope mount is securely attached to the firearm before each use.
- Do not exceed the manufacturer's recommended specifications for mounting and using scopes.
- Avoid using the scope mount in extreme weather conditions that may affect its performance.
- Be aware of your surroundings and ensure that the firearm is pointed in a safe direction at all times.
- Do not modify the scope mount in any way, as this may compromise its safety and functionality.

Instructions for Installation and Usage

1. Preparation

- Ensure the firearm is unloaded.
- Gather all necessary tools for installation, including a torque wrench and appropriate screwdrivers.

2. Installation Steps

- Locate the receiver mounted scope base on your M1A SOCOM II.
- Align the Quick Detach Scope Mount with the receiver mounted scope base.
- Secure the mount using the provided screws. Ensure they are tightened to the manufacturer's specifications using a torque wrench.
- Verify that the mount is securely attached and does not move.

3. Scope Installation

- Attach your scope to the integral rings of the Quick Detach Scope Mount.
- Ensure that the objective lens of the scope clears the top rail.
- Tighten the cap screws on the rings securely but avoid overtightening, which may damage the scope.

4. Adjustment

- Adjust the position of the scope for optimal eye relief and sight picture.
- Utilize the cantilever feature for forward/rearward adjustment as needed.

5. Final Checks

- Perform a visual inspection to ensure all components are securely fastened.
- Test the Quick Detach feature to confirm that the scope can be easily removed and reattached without loss of zero.

Disposal Instructions

- Dispose of the scope mount and any packaging materials in accordance with local regulations.
- Do not dispose of the product in household waste. Check for recycling programs in your area.
