

S&W J FRAME LASER ENHANCED GRIPS - RED LASER RUBBER GRIPS, BLACK

[Optics & Mounting](#) > [Electronic Sights](#) > [Laser Sights](#)

A Quantum Leap in the Shooting Comfort, Control & Accuracy of Your Belly Gun

Grips for the Smith & Wesson J-frame revolver with a laser sight built into them are nothing new. What is new is Hogue's Laser Enhanced (LE) rubber grip with programmable aiming laser. This is the classic Hogue rubber boot grip that has taken the sting out of shooting J-frames for generations - but now it packs a built-in red aiming laser. For serious techies, it's a 630-670nm <5mW Class 3R red laser. For the rest of us, it's a simple, ultra-reliable, supremely instinctive way to land your shots on target - fast. You can easily set your Hogue LE grips' laser to one of three output modes: steady, flashing (twice per second), and "stealth." Stealth mode emits 3 quick flashes each time you press the control button; hold it down to automatically switch into steady mode. There are also 4 brightness levels, to match the ambient light you expect to be operating in: 100%, 80%, 60% and 40%. Other features: Pebble-textured synthetic rubber over reinforced poly core Automatic laser activation - when you grasp the gun the laser is ON Master lockout switch prevents accidental laser activation & battery drain Heavy-duty 4mm laser diode stands up to your heaviest-recoiling loads Easy to adjust for windage & elevation Runs on two CR-2032 button cell batteries (included) Fits Smith & Wesson J-frame with round butt ONLY Of course, the LE grip is a Hogue, so it fits your hand like a glove. You'll forget about the laser until your hand settles in its natural position and the laser automatically turns on. Except for a small protrusion along the side of your Smith's frame (just ahead of the grip), the Hogue LE grip is no bulkier than a standard grip. You can continue to stow your S&W J-frame in your favorite concealed-carry rig.

Attributes

- Name: [RED LASER RUBBER GRIPS, BLACK](#)
- Manufacturer: [HOGUE](#)
- Product no.: 408000207
- Mfr. No.: 60080
- Battery: CR-2032
- Color: Black

Safety Instruction Guide for S&W J FRAME LASER ENHANCED GRIPS

Introduction

Thank you for choosing the S&W J FRAME LASER ENHANCED GRIPS. These grips are designed to enhance your shooting experience by providing a comfortable hold and an integrated laser sight. Please read this safety instruction guide carefully to ensure safe and effective use of your new grips.

General Safety Guidelines

- Always treat your firearm as if it is loaded, even if you believe it to be unloaded.
- Ensure that the laser sight is used in compliance with local laws and regulations.
- Keep the grips and firearm out of reach of children and unauthorized users.
- Regularly inspect the grips and laser for any signs of wear or damage.
- If you notice any malfunction or damage, discontinue use immediately and consult a qualified gunsmith.

Specific Safety Precautions for Use

- Do not point the laser at anyone or anything you do not intend to shoot.
- Avoid looking directly into the laser beam, as it may cause eye injury.
- Do not use the grips in wet or damp conditions, as this may affect the laser's functionality.
- Ensure that the battery is installed correctly and is not depleted before use.
- Familiarize yourself with the laser's output modes and brightness settings before using it in a shooting environment.

Instructions for Installation and Usage

Installation

1. **Remove the Old Grips:** Use the appropriate tools to carefully remove the existing grips from your Smith & Wesson Jframe revolver.
2. **Attach the New Grips:** Align the Hogue LE grips with the grip frame of the revolver. Ensure that the laser is positioned correctly.
3. **Secure the Grips:** Fasten the grips using the screws provided, ensuring they are tightened securely but not overtorqued to avoid damage.

Usage

1. **Activating the Laser:** The laser will automatically activate when you grasp the gun. Ensure your grip is secure before aiming.
2. **Adjusting the Laser:** Use the control button to switch between the three output modes: steady, flashing, and stealth. Hold the control button to switch to steady mode.
3. **Setting Brightness Levels:** Adjust the brightness of the laser to match ambient light conditions using the settings: 100%, 80%, 60%, and 40%.
4. **Adjusting for Windage and Elevation:** Use the adjustment features on the laser to ensure accurate targeting.

Disposal Instructions

- Dispose of the grips and any associated components in accordance with local regulations.
- For battery disposal, follow your local guidelines for the disposal of lithium batteries. Do not throw batteries in the regular trash.

Contact Information for Further Support

For further assistance or inquiries regarding the S&W J FRAME LASER ENHANCED GRIPS, please refer to the manufacturer's documentation or website.

Conclusion

By following these safety instructions, you can ensure a safe and enjoyable experience with your S&W J FRAME LASER ENHANCED GRIPS. Always prioritize safety and responsible usage to protect yourself and others.
