[Home](#)

The LV/119 SYSTEM is a family of products that work together to give end-users the ability to scale their equipment to their current needs. The fact that this is a cohesive system means that end-users are able to mix and match accessories in most cases. For example: One could take a COVERT Front or Rear Plate bag and use it with an OVERT Front and Rear Plate Bag. Users may cross pollinate cummerbunds, shoulder covers, and other parts that will be available. The SYSTEM encompasses many parts, some of which are currently available and some that are in development. These include Back Panels of various types, MOLLE cummerbunds, First Spear Tubes™ integrations, and different placards. The LV/119 OVERT Rear Plate bag was built for those who need a scalable vest to wear in a multitude of environments ranging from Low Visibility to Direct Action. The OVERT shares the same profile as the COVERT plate bags, while possessing additional features that make it more suitable for high profile operations. The rear plate bag features full integration of our Recovery Handle™. The rear bag also features minimal MOLLE webbing and Zippers for future integrations with our Zip-on panels that will be available later this year. Recovery Handle Integration. Full integration of our Recovery Handle. NOTE: the Recovery Handle is NOT included with this product. NOTE: The LV/119 OVERT Rear Plate Bag requires a Front Bag and Cummerbund for proper operation. Back Panel Support. The rear bag also features minimal MOLLE webbing and Zippers for integrations with our Zip-on panels. Note: The back panel integration is proprietary and will not support other brands of back panels. Communications Cable Routing. The Modern Warfighter and Law Enforcement Officer has a radio. To date, the majority of manufacturers have not taken end-user communications needs into their design considerations - we endeavor to break that paradigm. The OVERT offers open shoulders to facilitate comms cable routing inside the plate bags and over the shoulders. Cables may also be routed through the cummerbund access. Cummerbund Attachment. The cummerbund attachment is a proprietary system that allows for the use of all of our cummerbunds as well as allowing for a wide range of adjustment. The cummerbund attaches inside the plate bag, which is advantageous for a few reasons. There is no external mounting that can get snagged or rip off when exiting vehicles in haste. The design creates a smooth profile when worn underneath clothing. Velcro is not utilized as an attachment to the rear plate bag. Velcro wears out over time and is a generally less-than-optimal attachment method when not supported in other ways. Velcro doesn't handle weight well and it sticks to everything, especially cloth seats. Every front plate bag comes standard with sewn loops on the sides for attaching First Spear TUBES for use with Spiritus Systems tubes cummerbund. Plate Fitment. The carrier was designed to fit United States Standard Issue SAPI cut plates, but it will fit other cuts as well as long as they fit within the specifications listed below. The bags were built to accommodate thicker plates, but they will not fit plates do not fall within the measurements listed. Medium -10 x 12.5 Large - 10.25 x 13.25 Extra Large- 11 x 14.00 Thickness - MAXIMUM of 1.20 NOTE: The LV119 Rear Plate Bag is part of the LV119 Plate Carrier System. This item does not include a Front Plate Bag, Cummerbund, Shoulder Covers, Placards, or any other accessories. Additional components are required for proper use. Some images shown with optional accessories, sold separately.

## Specific Safety Precautions for Use

- **Compatibility:** Ensure that the LV119 Rear Overt Plate Bag is used with compatible front bags and cummerbunds for proper operation.
- **Weight Limit:** Be aware of the weight limits of the bag and avoid overloading it, which could compromise safety.
- **Proper Fitment:** The bag is designed to fit United States Standard Issue SAPI cut plates. Ensure that the plates fit within the specified measurements:
  - Medium: 10 x 12.5 inches
  - Large: 10.25 x 13.25 inches
  - Extra Large: 11 x 14.00 inches
  - Thickness: Maximum of 1.20 inches
- **Avoid Snags:** When exiting vehicles or moving through tight spaces, be cautious of any external mounting that could snag or rip off.
- **Cable Routing:** Ensure that communication cables are routed properly to avoid tangling or damage during use.
- **No Velcro:** Avoid using Velcro for attachment as it may wear out over time and is not optimal for carrying weight.

## Instructions for Installation and Usage

### 1. Installation of the Plate Bag:

- Open the rear plate bag and insert the compatible plate ensuring it fits snugly.
- Secure the plate in place according to the manufacturer's instructions.

### 2. Attaching the Cummerbund:

- Locate the cummerbund attachment points inside the plate bag.
- Attach the cummerbund securely, ensuring it is adjusted to fit comfortably.

### 3. **Using the Recovery Handle:**

- The Recovery Handle is integrated into the rear plate bag for ease of use. Note that the handle is not included with the product.
- Ensure that the handle is securely integrated before use.

### 4. **Cable Routing:**

- Route communication cables through the designated openings to keep them organized and prevent tangling.
- Ensure cables are not pinched or damaged during use.

### 5. **Wearing the Vest:**

- Adjust the straps for a snug fit, ensuring that the vest does not impede movement.
- Ensure that the vest is worn under clothing if required for concealment.

## **Disposal Instructions**

- **Disposal of the Product:** When the product reaches the end of its lifecycle, dispose of it in accordance with local regulations.
- **Recycling:** If possible, recycle materials according to local recycling guidelines to minimize environmental impact.
