

SIDE ARMOR BAGS - SPIRITUS SYSTEMS SIDE ARMOR BAGS - BLACK

[Home](#)

Side Armor Bags The Spiritus Systems Side Armor Bags are modular in design and allow for the use of hard armor plates, soft armor inserts (with the addition of one of Spiritus Side Armor Bag Caps), or both hard and soft armor at the same time. The bags were built with an offset MOLLE configuration, which allows the user to wear the plates as far forward on the cummerbund as possible. Wearing your side armor as far forward allows for side plate to front plate contact and closes a small gap in protection left over by traditional side armor systems currently on the market. Side Armor Bags are compatible with MOLLE cummerbunds and will not work with elastic cummerbunds. Plate Fitment: The Spiritus Systems Side Armor Bags are built with stretch materials to accommodate 6" x 6" hard armor plates up to 1" thick in a standalone configuration. The use of soft armor inserts requires the addition of our Side Armor Bag Caps which can then accommodate 5" x 7" to 5"x 14" rectangular soft armor inserts. Sold as a set of two Armor bags. Note: This component is an optional accessory to the Spiritus Systems LV/119 Plate Carrier system. Plate carrier and all other components are sold separately. This product may be shown with optional accessories. Made in the USA
