

# ASSAULT BACK PANEL CORE - SPIRITUS SYSTEMS ASSAULT BACK PANEL CORE - WOODLAND

[Home](#)

The top of the Panel features a custom double pull, separating zipper. This zipper serves three purposes. It allows the Flaps to be completely removed from the Core and swapped out. It allows communication antennas and other items such as cabling, hydration tubes, and breaching tools to be routed into and out of the top of the panel. It provides quick access to the inside of the panel without lifting the entire Flap. The Assault Panel Core also has three direction snaps to hold Flaps securely on and to keep tools held inside the panel. The Assault Panel Core features 4 external attachment zippers. These zippers allow the panel to be worn in three configurations. Configuration 1 uses the top zippers to attach the panel to the plate bag. This compresses the panel and allows the panel to be worn in a "light" configuration. This configuration of the panel is great for assaulters who want a streamlined and tight configuration and only need to carry things like a small hydration bladder, slap charges, flash bangs and GP kit on their backs. Configuration 2 uses the bottom zippers to attach the panel to the plate bag. This configuration gives the user much more capacity and configures the panel into more of a backpack. This provides the same features as Configuration 1, but with the added volume for bulky items such as radios, cold weather gear, poll less litters, etc. Configuration 3 also uses the bottom zippers to attach to the rear plate bag, but introduces the bottom expansion as well. This expansion offers the ability to carry longer tools and store even more bulky items in the expanded space. The Assault Panel Core comes standard with a permanently affixed large GP pocket on the lower half. This pocket is velcro lined for attachment of accessory items. It features a total of two tie down locations inside the pouch for securing sensitive equipment. The front of the pouch features a zippered stash pocket for organizing smaller, commonly needed items. This pocket also has a 4" x 5" Velcro Field for attaching identification patches. Behind the GP pocket is a hidden stash compartment. This is used for storing the lower half of slap charges or breach pens when they are passed through the flaps above. It can also be used to stash E&E equipment or smaller personal items. Each side of the panel features six tie down loops for securing longer items external to the panel. These loops are great for attaching Tri-Fold or Bi-Fold charges or other tall items. The bottom expansion has a G-Hook internal to the panel that allows you to secure it in place if a heavier load needs to be carried inside, but you do not want the expansion to deploy inadvertently. Fitment Guide Medium Overt Plate Bags - Fits Large Overt Plate Bags - Fits, could use an XL Adapter if you have very thick plates, and are overloading the panel. Extra Large Overt Plate Bags - Needs an XL Adapter to be compatible with the XL Plate Bags. Some images shown with optional accessories, sold separately.

## Attributes

- Name: [SPIRITUS SYSTEMS ASSAULT BACK PANEL CORE - WOODLAND](#)
- Manufacturer: [SPIRITUS SYSTEMS](#)
- Product no.: 430101889

# Safety Instruction Guide for the ASSAULT BACK PANEL CORE WOODLAND

## Introduction

Thank you for choosing the ASSAULT BACK PANEL CORE from SPIRITUS SYSTEMS. This guide provides essential safety instructions to ensure the proper use and maintenance of your product. Please read this guide carefully to understand the safety precautions and usage instructions.

## General Safety Guidelines

- Ensure safe handling and usage of the ASSAULT BACK PANEL CORE.
- Be aware of the potential risks associated with improper use.
- Always check for product recalls and safety updates through the EU's Safety Gate platform.
- Report any unsafe products or accidents to the relevant authorities.
- Ensure that vulnerable groups, such as children, are supervised when using or handling the product.
- For safety inquiries, refer to the designated EU contact point associated with this product.

## Specific Safety Precautions for Use

- Before use, inspect the panel for any signs of damage or wear.
- Ensure that all zippers and snaps are securely fastened before wearing the panel.
- Do not overload the panel beyond its recommended capacity to avoid strain and potential failure.
- When attaching items to the panel, ensure they are securely fastened to prevent them from falling during use.
- Be cautious when routing communication antennas or other items through the top of the panel to avoid tangling or snagging.
- Keep the panel away from sharp objects that may cause damage.
- Always use the panel in accordance with the specified configurations for optimal safety and performance.

## Instructions for Installation and Usage

### 1. Configuration Options

- **Configuration 1:** Use the top zippers to attach the panel to the plate bag for a "light" configuration. Ideal for carrying minimal items like a small hydration bladder and essential tools.
- **Configuration 2:** Use the bottom zippers to attach the panel to the plate bag for increased capacity. Suitable for carrying bulkier items such as radios and cold weather gear.
- **Configuration 3:** Also use the bottom zippers, but utilize the bottom expansion for carrying longer tools and additional bulky items.

### 2. Attaching Flaps

- The custom double pull, separating zipper at the top allows for complete removal and swapping of the Flaps.
- Ensure that the Flaps are securely attached using the three direction snaps to prevent them from detaching during use.

### 3. Using the GP Pocket

- The large GP pocket is designed for storing essential items. Ensure that it is properly closed using the Velcro lining.
- Use the two tie down locations inside the pocket for securing sensitive equipment.

- Utilize the zippered stash pocket for organizing smaller items.

#### **4. Securing External Items**

- Use the six tie down loops on each side of the panel to secure longer items externally.
- Ensure that items attached to the loops do not obstruct your movement or visibility.

#### **5. Bottom Expansion**

- The bottom expansion includes a GHook for securing heavier loads. Make sure to fasten it properly to prevent inadvertent deployment.

## **Disposal Instructions**

- Dispose of the ASSAULT BACK PANEL CORE in accordance with local regulations.
- If the panel is damaged beyond repair, consider recycling materials where applicable.
- Ensure that any hazardous materials are disposed of safely and responsibly.

## **Contact Information for Further Support**

For any inquiries or support related to the ASSAULT BACK PANEL CORE, please refer to the designated EU contact point associated with this product.

By following these guidelines, you can ensure the safe and effective use of your ASSAULT BACK PANEL CORE. Thank you for your attention to safety, and enjoy your product!
