

NECK TENSION GAGE TOOL - FORSTER PRODUCTS, INC. 5 PIECE NECK TENSION GAGE TOOL KIT

[Reloading](#) > [Measuring Tools](#) > [Case Gauges & Headspace Tools](#)

Use the Neck Tension Gage (NTG) as an inspection tool to quickly and accurately screen/sort a batch of brass before your bullet seating operation. The NTG provides reloaders with the information needed to create exacting neck tensions during the bullet seating operation. Use after case neck sizing and before bullet seating to help determine optimal inside neck diameter for consistent release of a bullet from your reloaded rounds. Allows for inspection of the inside diameters of case necks to be sure a "donut" has not formed at the neck-shoulder junction. Available in five calibers, the NTG Neck Tension Gage Inspection Tool consists of four stepped diameters that increase in size until reaching the handle. Each diameter is etched on the metal tool. Simply insert the stepped end of the tool into the neck of your sized case, sliding it in until one of the diameters achieves a slip fit in the case neck. Use the resulting value to fine-tune your case preparation. Kit comes with all 5 calibers.

NECK TENSION GAGE TOOL SAFETY INSTRUCTIONS

Introduction

Thank you for choosing the NECK TENSION GAGE TOOL by Forster Products, Inc. This tool is designed to assist reloaders in achieving precise neck tensions during bullet seating operations. To ensure safe and effective use of this product, please read and follow the safety instructions outlined in this guide.

General Safety Guidelines

- Always handle the Neck Tension Gage Tool with care to prevent injury.
- Ensure the tool is used in a welllit and organized workspace.
- Keep the tool out of reach of children and vulnerable individuals.
- Regularly inspect the tool for any signs of damage or wear. Do not use if damaged.
- Follow all local laws and regulations regarding the use of reloading tools and equipment.

Specific Safety Precautions for Use

- Use the Neck Tension Gage Tool only for its intended purpose: to measure and inspect case neck diameters.
- Do not apply excessive force when inserting the tool into the case neck to avoid damaging both the tool and the case.
- Always check the tool for any debris or obstructions before use to ensure accurate measurements.
- If you experience any discomfort or injury while using the tool, stop using it immediately and consult a professional.
- Store the tool in a safe and dry place when not in use to prevent corrosion or damage.

Instructions for Installation and Usage

1. Preparation:

- Ensure that the case neck has been properly resized before using the Neck Tension Gage Tool.
- Select the appropriate caliber from the five available options in the kit.

2. Using the Tool:

- Hold the tool by the handle and insert the stepped end into the neck of the sized case.
- Slide the tool into the case neck until you achieve a slip fit with one of the diameters.
- Take note of the diameter that fits snugly as this indicates the optimal inside neck diameter for bullet seating.
- Use this measurement to adjust your case preparation for consistent bullet release.

3. PostUse:

- After use, clean the tool if necessary to remove any brass residue or debris.
- Store the tool in its original packaging or a safe location to prevent damage.

Disposal Instructions

- Dispose of the Neck Tension Gage Tool in accordance with local regulations.
- If the tool is damaged beyond repair, contact local waste management services for proper disposal methods.

Contact Information for Further Support

For any safety inquiries or additional support, please refer to the contact information provided with your product packaging or visit the manufacturer's website.

Conclusion

By following these safety instructions, you can ensure a safe and effective experience while using the NECK TENSION GAGE TOOL. Always prioritize safety and proper usage to maximize the tool's effectiveness in your reloading operations. Thank you for your attention to these guidelines.
