

SINGLE ACTION REVOLVER GAS RING SHIMS - POWER CUSTOM SA GAS RING SHIMS, 10-PAK

[Gunsmith Tools](#) > [Handgun Tools](#) > [Chamber Tools](#)

Fast, Drop-In Solution For Eliminating Excess Cylinder Endshake

Eliminate excess cylinder endshake on Colt and clones, plus all Ruger® single action revolvers with these stainless steel gas ring shims. Installs between frame and the front of the gas ring to eliminate cylinder binding caused by the cylinder face rubbing the rear of the barrel, and helps cure headspace problems that can lead to misfires. Shim thickness of .0045" accommodates most revolvers that have cylinder endshake problems; remove material from the gas ring for "tighter" guns. Developed by master pistolsmith Ron Power as a cost-effective alternative to stretching the gas ring. Whether you're servicing a worn gun or building a custom one, these shims will help turn out a first-class job. Available in 10-paks.

Safety Instruction Guide for SINGLE ACTION REVOLVER GAS RING SHIMS POWER CUSTOM SA GAS RING SHIMS, 10PAK

Introduction

Thank you for choosing the SINGLE ACTION REVOLVER GAS RING SHIMS from POWER CUSTOM. This product is designed to enhance the performance of your Colt and Ruger® single action revolvers by eliminating excess cylinder endshake. To ensure safe and effective use of this product, please read and follow the safety instructions outlined in this guide.

General Safety Guidelines

- Ensure that the product is used in accordance with the manufacturer's instructions.
- Always handle firearms with care and ensure they are unloaded before performing any maintenance.
- Keep this product out of reach of children and unauthorized users.
- Regularly check for any signs of wear or damage on the shims and the revolver.
- Report any unsafe products or incidents to the relevant authorities.
- Stay informed about product recalls and safety updates through the EU's Safety Gate platform.

Specific Safety Precautions for Use

- Always wear safety glasses when working with firearms to protect your eyes from debris.
- Use the shims only with compatible revolvers: Colt SA and clones, and all Ruger SA revolvers.
- Ensure that the base pin diameter does not exceed .260" and the gas ring is no smaller than .380".
- Do not attempt to modify the shims beyond their intended purpose.
- If you are unsure about the installation or compatibility, consult a qualified gunsmith.

Instructions for Installation and Usage

1. Preparation:

- Ensure the revolver is unloaded and the work area is clean and welllit.
- Gather the necessary tools, including a small file or sandpaper if material removal is needed.

2. Installation:

- Remove the cylinder from the revolver according to the manufacturer's guidelines.
- Identify the gas ring on the cylinder and the corresponding area on the frame.
- Place the gas ring shim between the frame and the front of the gas ring.
- Ensure the shim is seated properly and does not obstruct any moving parts.

3. Adjustment:

- If necessary, remove material from the gas ring to achieve a tighter fit for revolvers with excessive endshake.
- Regularly check the fit after adjustments to ensure proper function.

4. Final Check:

- Reassemble the revolver and ensure all components are securely fastened.
- Test the revolver in a safe environment to confirm proper operation.

Disposal Instructions

- Dispose of any damaged or worn shims in accordance with local waste disposal regulations.
- Do not dispose of the shims in regular household trash. Instead, consider recycling options where available.

Contact Information for Further Support

For any questions or concerns regarding the use of this product, please contact the manufacturer or consult a qualified gunsmith. Always refer to the latest safety guidelines and product updates available through official channels.

By following these safety instructions, you can ensure the safe and effective use of the SINGLE ACTION REVOLVER GAS RING SHIMS. Enjoy enhanced performance and reliability with your revolver.
