

WILSON CASE GAGE - 30-40 Krag Case Gage

[Reloading](#) > [Measuring Tools](#) > [Case Gauges & Headspace Tools](#)

The most important use of a cartridge case gage is for setting up 7/8"-14 press type full length resizing dies. A common error in reloading is to oversize your brass. Headspace of fired cases can quickly and accurately be measured using this tool and a caliper. Regular Style: This one piece gage will check overall length to indicate a need for trimming and datum to head length to assure correct headspace to prevent over sizing. Adjustable Style: For belted mags. While the belt provides support for proper headspace, the life of the case will drastically shorten unless resizing is held to a minimum at the shoulder. SPECIAL ORDER CASE GAGES ARE AVAILABLE---MEASURE CASE LENGTH ONLY

Attributes

- Name: [30-40 Krag Case Gage](#)
- Manufacturer: [L.E. Wilson, Inc.](#)
- Product no.: 749003855
- Mfr. No.: CG-3040
- Cartridge: 30-40 Krag
- Delivery weight: 0.204kg
- Shipping height: 28mm
- Shipping width: 36mm
- Shipping length: 86mm
- UPC: 857949005579

WILSON CASE GAGE 3040 Krag Case Gage

Safety Instruction Guide

Introduction

Thank you for choosing the WILSON CASE GAGE 3040 Krag Case Gage. This guide provides essential safety instructions to ensure the safe use of this product. Please read and follow all instructions carefully to prevent accidents and ensure optimal performance.

General Safety Guidelines

- Ensure that you are familiar with the operation of the case gage and reloading equipment before use.
- Always inspect the case gage for any signs of damage or wear before use.
- Keep the case gage out of reach of children and vulnerable individuals.
- Use the case gage only for its intended purpose as described in this guide.
- Report any unsafe conditions or accidents to the appropriate authorities.
- Regularly check for updates and recalls on the EU's Safety Gate platform.

Specific Safety Precautions for Use

- **Hazard Identification:**
 - Improper use may lead to oversizing of brass, which can affect firearm safety and performance.
 - Ensure that the gage is clean and free from debris before use to avoid inaccurate measurements.
- **Avoiding Hazards:**
 - Always measure fired cases before resizing to ensure correct headspace.
 - Do not exceed the recommended resizing limits for your specific cartridge.
 - Use appropriate personal protective equipment (PPE), such as safety glasses, when handling reloading equipment.

Instructions for Installation and Usage

- **Installation:**
 - Ensure that your reloading press is securely mounted and stable.
 - Attach the 7/8"14 press type fulllength resizing die according to the manufacturer's instructions.
 - Insert the WILSON CASE GAGE into the die to confirm proper setup.
- **Usage:**
 - Measure the overall length of the cartridge case using the gage to determine if trimming is necessary.
 - Use a caliper to measure the headspace of fired cases accurately.
 - For belted magnums, ensure that resizing is minimized at the shoulder to prolong case life.
- **PostUse:**
 - After use, clean the case gage to remove any residue or debris.
 - Store the gage in a safe, dry place, away from children and pets.

Disposal Instructions

- Dispose of the case gage responsibly in accordance with local regulations.
- If the gage is damaged and cannot be repaired, consider recycling materials where possible.

Contact Information for Further Support

For further assistance or inquiries regarding the WILSON CASE GAGE 3040 Krag Case Gage, please refer to the manufacturer's website or contact your local distributor. It is important to have access to support for any safety

concerns or productrelated questions.

By following these guidelines, you can ensure the safe and effective use of your WILSON CASE GAGE. Thank you for prioritizing safety and compliance with EU regulations.
