

WILSON NECK REAMER - L.E. WILSON 22 CALIBER (0.219") INSIDE NECK REAMER

[Reloading](#) > [Case Preparation](#) > [Case Neck Reamers](#)

Thick necks can cause high chamber pressures and erratic shooting. Wilson neck reamers remove excess neck material to insure adequate clearance exists between the case neck and the chamber. Also, these reamers can be used when forming wildcats from a parent case. Reamers are used in the Wilson trimmer in place of the trimmer cutter. Standard reamers are sized for use on fired, unsized cases and measure .0025" - .003" larger than bullet diameter. Custom size reamers can be ground (allow 6-8 week delivery).

WILSON NECK REAMER L.E. WILSON 22 CALIBER (0.219") INSIDE NECK REAMER Safety Instructions

Introduction

Thank you for choosing the WILSON NECK REAMER L.E. WILSON 22 CALIBER (0.219"). This product is designed to enhance your reloading experience by ensuring proper neck sizing for optimal chamber fit. To ensure your safety and the effective use of this product, please read and follow the safety instructions outlined in this guide.

General Safety Guidelines

- Always use the neck reamer in a wellventilated area.
- Wear appropriate personal protective equipment (PPE) including safety glasses and gloves to protect against debris and sharp edges.
- Keep the workspace clean and organized to prevent accidents.
- Ensure that the reamer is stored out of reach of children and pets.
- Regularly inspect the reamer for any signs of wear or damage before use.
- Do not attempt to modify or repair the reamer yourself. Seek professional assistance for repairs.

Specific Safety Precautions for Use

- Ensure that the case neck is clean and free of any obstructions before using the neck reamer.
- Always use the reamer according to the manufacturer's specifications to avoid damaging the tool or the cases.
- Use only the recommended trimmer cutter compatible with the Wilson trimmer when using the neck reamer.
- Be aware of the potential for high chamber pressures when using neck reamers with thick necks. Follow proper reloading practices.
- Do not exceed the recommended size specifications. Custom reamers can be ground to specific sizes but require a lead time of 68 weeks.
- Avoid direct contact with the cutting edges of the reamer to prevent injury.

Instructions for Installation and Usage

1. Installation:

- Remove the trimmer cutter from the Wilson trimmer.
- Insert the neck reamer into the trimmer's designated holder securely.
- Ensure that the reamer is properly aligned and locked in place.

2. Usage:

- Select the fired, unsized case you wish to ream.
- Place the case neck into the trimmer where the neck reamer is installed.
- Operate the trimmer according to the manufacturer's instructions, ensuring a smooth and steady motion.
- Check the case neck size frequently to avoid overreaming. The reamer should measure .0025" .003" larger than the bullet diameter.
- After use, clean the reamer and store it in a safe location.

Disposal Instructions

- Dispose of any debris or material removed during the reaming process in accordance with local regulations.
- If the neck reamer is damaged beyond repair, dispose of it responsibly. Check with local waste management for proper disposal methods for metal tools.

Contact Information for Further Support

For any inquiries regarding safety concerns or product usage, please refer to the manufacturer's contact information provided on the packaging or product documentation.

By adhering to these safety instructions, you can ensure a safe and effective experience while using the WILSON NECK REAMER L.E. WILSON 22 CALIBER (0.219"). Thank you for prioritizing safety and responsible usage.
