

# WILSON CASE GAGE - L.E. WILSON 7.5X55MM SWISS CASE GAGE

[Reloading](#) > [Measuring Tools](#) > [Case Gauges & Headspace Tools](#)

The most important use of a cartridge case gage is for setting up 7/8"-14 press type full length resizing dies. A common error in reloading is to oversize your brass. Headspace of fired cases can quickly and accurately be measured using this tool and a caliper. Regular Style: This one piece gage will check overall length to indicate a need for trimming and datum to head length to assure correct headspace to prevent over sizing. Adjustable Style: For belted mags. While the belt provides support for proper headspace, the life of the case will drastically shorten unless resizing is held to a minimum at the shoulder. SPECIAL ORDER CASE GAGES ARE AVAILABLE---MEASURE CASE LENGTH ONLY

## Attributes

- Name: [L.E. WILSON 7.5X55MM SWISS CASE GAGE](#)
- Manufacturer: [L.E. WILSON](#)
- Product no.: 749014483

## SWISS CASE GAGE Safety Instructions

### Introduction

Thank you for choosing the WILSON CASE GAGE L.E. WILSON 7.5X55MM SWISS CASE GAGE. This product is designed to help you accurately measure and set up your reloading equipment. To ensure your safety and the effective use of this product, please read and follow these safety instructions carefully.

### General Safety Guidelines

- Ensure safe use of the case gage by following all instructions provided.
- Be aware of potential risks associated with reloading and measuring cartridge cases.
- Always use the case gage in a welllit and clean workspace.
- Keep the product out of reach of children and vulnerable individuals.
- Regularly check for updates on safety and recall information through the EU's Safety Gate platform.

### Specific Safety Precautions for Use

- Always handle the case gage with care to prevent damage and ensure accurate measurements.
- Do not use the case gage for any purpose other than measuring cartridge cases.
- Avoid using the gage with cases that show signs of excessive wear or damage.
- When measuring, ensure that the gage is placed on a stable surface to prevent slipping.
- Use appropriate personal protective equipment (PPE) such as safety glasses when reloading ammunition.

### Instructions for Installation and Usage

#### 1. Setting Up the Gage

- Remove the gage from its packaging and inspect for any damage.
- Place the gage on a flat, stable surface.

#### 2. Measuring Cartridge Cases

- Insert the cartridge case into the gage to check the overall length.
- Use a caliper to measure the headspace of fired cases accurately.
- For the adjustable style, ensure the gage is set correctly for belted magnum cases.

#### 3. Determining Need for Trimming

- Check the overall length against specifications.
- If the case exceeds the recommended length, trim it to ensure proper headspace.

#### 4. Maintenance

- Clean the gage regularly to maintain accuracy.
- Store the gage in a protective case or designated area when not in use.

### Disposal Instructions

- Dispose of the gage according to local regulations.
- Do not dispose of the gage in regular household waste if it is damaged or no longer functional.
- Consider recycling options available in your area.

## **Contact Information for Further Support**

For any inquiries regarding the use or safety of the WILSON CASE GAGE L.E. WILSON 7.5X55MM SWISS CASE GAGE, please refer to the manufacturer's contact information provided on the packaging or product documentation.

Thank you for prioritizing safety while using the WILSON CASE GAGE. Your adherence to these guidelines ensures a safe and effective reloading experience.
