

MAG 25 DIGITAL FURNACE - LYMAN MAG 25 DIGITAL FURNACE (115V)

[Reloading](#) > [Bullet Casting](#) > [Casting Furnaces & Accessories](#)

The Mag 25 is an upgraded version of Lyman's ultra-reliable Mag 20 bottom-pour casting furnace. The list of added features includes an extra 5 lbs. of lead capacity, bringing the total to a whopping 25 lbs. so you can melt more lead - faster. The 850-watt unit heats up quickly, and it's outfitted with a keypad-controlled digital display that shows the actual temperature of the lead, in addition to the desired temperature setting. The Mag 25 comes with a universal mould guide that may be adjusted for use with mould blocks from Lyman, RCBS, Redding/Saeco and Lee. An ultra-sturdy base supports the furnace and includes two front-loading compartments for convenient on-board storage associated tools.

MAG 25 DIGITAL FURNACE SAFETY INSTRUCTIONS

Introduction

Thank you for choosing the MAG 25 Digital Furnace by Lyman. This guide provides essential safety instructions to ensure the safe and effective use of your furnace. Please read and follow all instructions carefully to minimize risks and ensure a safe working environment.

General Safety Guidelines

- Always use the furnace in a wellventilated area to prevent the accumulation of harmful fumes.
- Keep the furnace away from flammable materials and surfaces.
- Ensure that the furnace is placed on a stable, heatresistant surface.
- Avoid touching hot surfaces of the furnace during operation; use appropriate tools or protective gear.
- Regularly inspect the furnace for any signs of damage or wear before use.
- Always follow local regulations regarding the handling and disposal of lead and other materials.

Specific Safety Precautions for Use

- Do not operate the furnace without proper supervision.
- Ensure that children and pets are kept at a safe distance from the furnace during operation.
- Use only the recommended types of lead and materials for melting.
- Avoid overloading the furnace beyond its specified capacity of 25 lbs.
- Do not attempt to modify or repair the furnace yourself; contact a qualified technician for assistance.
- In case of any malfunction, disconnect the power supply immediately and seek professional help.

Instructions for Installation and Usage

1. Installation

- Place the furnace on a flat, stable surface away from any flammable materials.
- Ensure that the power cord is not damaged and is plugged into a suitable electrical outlet (115V).
- Allow sufficient space around the furnace for ventilation.

2. Usage

- Before turning on the furnace, ensure that the lead is clean and free from contaminants.
- Set the desired temperature using the keypadcontrolled digital display.
- Monitor the actual temperature displayed on the screen to avoid overheating.
- Use the universal mould guide to align your mould blocks properly before pouring.
- Always wear appropriate protective gear, including gloves and safety goggles, when operating the furnace.
- Once melting is complete, carefully pour the molten lead into the moulds, ensuring a steady hand and clear path.

Disposal Instructions

- Follow local regulations for the safe disposal of lead and other hazardous materials.
- Do not dispose of lead in regular waste; contact local authorities for proper disposal methods.
- Clean the furnace and surrounding area after use to remove any lead residue.

Contact Information for Further Support

For any safety inquiries, product support, or to report unsafe products, please refer to your local authorities or the designated EU contact point for assistance.

Thank you for your attention to these safety instructions. Your safety is our priority. Enjoy your MAG 25 Digital Furnace!
