Maxima Grooved Receiver Line of scope mounts are designed to fill the need of mounting scopes to rifles with an integrated receiver mounting rail. Because each manufacturer has their own proprietary mounting rail design, each ring model must be machined to exacting tolerances for proper fit and function. The Maxima Grooved Receiver line fulfills that need. The precision CNC machined Warne rings provide unsurpassed strength, durability and quality, and fit a variety of rifle models including Ruger #1, Ruger 77, Mini 14 & 30, and Ruger Blackhawk and Redhawk. The Maxima QD rings sport the unique Warne indexable lever system which allows the user to remove the optics from the rifle then reattach it without the loss of zero, as well as allowing the location of the lever to be indexed once the rings are affixed to the bases. After the levers are tightened, simply pull out on the lever, turn it to the desired location then let it snap into place.
