

Cartridge Overall Length Gage

[Reloading](#) > [Measuring Tools](#) > [Case Gauges & Headspace Tools](#)

If you have a cleaning rod and a set of calipers, you can now determine the optimum OAL for any bullet in less than two minutes. This simple kit consists of two clamps that easily attach to any cleaning rod, 1/4" in diameter, or less. Simply insert a cleaning rod into the barrel so that it contacts the bolt face, then install one clamp at the end of the barrel. Remove the cleaning rod and insert a dummy round into the chamber so that the bullet is in contact with the rifling. Touch the cleaning rod end to the bullet and attach the second clamp at the end of the barrel. Remove and measure the distance between the two clamps, or use as a gauge to check the seating depth set-up during your reloading sequence. Works on all rifles.

Frankford Arsenal Cartridge Overall Length Gage

Safety Instruction Guide

Introduction

Thank you for choosing the Frankford Arsenal Cartridge Overall Length Gage. This tool is designed to help you determine the optimum Overall Length (OAL) for any bullet quickly and accurately. Please read this safety instruction guide carefully to ensure safe and effective use of the product.

General Safety Guidelines

- Always handle tools and equipment with care.
- Ensure that you are in a safe and controlled environment when using the gage.
- Keep the gage and all components out of reach of children.
- Regularly inspect the gage for wear or damage before each use.
- Do not use the gage for any purpose other than its intended use.
- If you experience any difficulties or uncertainties while using the gage, seek assistance.

Specific Safety Precautions for Use

- Ensure that the cleaning rod used is in good condition and free of defects.
- Use only the recommended size cleaning rod ($\frac{1}{4}$ " in diameter or less).
- Always wear appropriate eye protection when using the gage.
- Avoid placing your hands near the muzzle of the firearm while using the gage.
- Do not attempt to use the gage with live ammunition in the chamber.
- Follow all local laws and regulations regarding firearms and ammunition.

Instructions for Installation and Usage

1. Preparation:

- Gather the necessary tools: a cleaning rod and calipers.
- Ensure the firearm is unloaded and the chamber is clear.

2. Setting Up the Gage:

- Insert the cleaning rod into the barrel until it contacts the bolt face.
- Install one clamp at the end of the barrel to secure the cleaning rod in place.

3. Measuring the OAL:

- Remove the cleaning rod from the barrel.
- Insert a dummy round into the chamber, ensuring the bullet contacts the rifling.
- Touch the end of the cleaning rod to the bullet.
- Attach the second clamp at the end of the barrel.

4. Final Measurements:

- Remove the cleaning rod and measure the distance between the two clamps using calipers.
- Use this measurement to check the seating depth during your reloading process.

Disposal Instructions

- Dispose of any damaged or unusable components in accordance with local regulations.
- Do not dispose of the gage or its parts in household waste.
- Consider recycling options where available.

Contact Information for Further Support

For any inquiries or concerns related to the Frankford Arsenal Cartridge Overall Length Gage, please contact the manufacturer directly through their official channels.

By following these guidelines and instructions, you can ensure a safe and effective experience with your Frankford Arsenal Cartridge Overall Length Gage. Thank you for your attention to safety!
