

# Ultra Jag - Ultra Jag 243 / 6mm Caliber

[Gun Cleaning & Chemicals](#) > [Cleaning Rods & Accessories](#) > [Cleaning Rod Jags](#)

Take a modern bore solvent and squirt it on a brass cleaning jag. The liquid will turn blue as it drips off the jag - it is working so fast, it starts to dissolve your cleaning jag in front of your eyes! If you are following conventional wisdom "clean until you get a clear patch" you might be in for a long night. Tipton®'s Ultra Jag™ features a patent-pending technology that covers the surface of a traditional push-type jag with solvent-proof material, keeping aggressive modern bore solvents from creating false blue stains that normally indicate copper fouling. When you use Ultra Jags, you will get better, faster cleaning results because you will know you are getting blue stains from copper fouling and not from the surface of your jag.

# Tipton Ultra Jag Safety Instructions

## Introduction

Thank you for choosing the Tipton Ultra Jag for your cleaning needs. This guide provides essential safety instructions to ensure the safe and effective use of the product. Please read this document carefully before using the Ultra Jag.

## General Safety Guidelines

- Ensure that the product is used only for its intended purpose – cleaning firearm bores.
- Keep the product out of reach of children and vulnerable individuals.
- Always wear appropriate personal protective equipment, such as gloves and safety goggles, when handling cleaning solvents.
- Store the Ultra Jag in a cool, dry place away from direct sunlight and heat sources.
- Regularly inspect the Ultra Jag for any signs of wear or damage. Do not use if damaged.

## Specific Safety Precautions for Use

- Before using the Ultra Jag, ensure that the firearm is unloaded and pointed in a safe direction.
- Use only modern bore solvents recommended for use with brass cleaning jags.
- Avoid prolonged exposure of the Ultra Jag to solvents, as this may compromise the integrity of the product.
- Do not attempt to clean the Ultra Jag with abrasive materials or harsh chemicals.
- If you experience any irritation or adverse reaction while using solvents, discontinue use immediately and seek medical advice.

## Instructions for Installation and Usage

### 1. Preparation:

- Ensure your firearm is completely unloaded.
- Gather all necessary cleaning supplies, including a cleaning rod, bore solvent, and the Ultra Jag.

### 2. Application:

- Apply a modern bore solvent directly onto the brass cleaning jag.
- Observe the solvent as it drips from the jag; a blue color indicates the solvent is working effectively.

### 3. Cleaning Process:

- Insert the Ultra Jag into the bore of the firearm gently.
- Push the cleaning rod back and forth through the bore to allow the solvent to work on fouling.
- Monitor the color of the residue on the jag to confirm the presence of copper fouling.

### 4. Completion:

- Once cleaning is complete, remove the Ultra Jag and clean with a dry patch to remove excess solvent.
- Store the Ultra Jag safely after use.

## **Disposal Instructions**

- Dispose of any used solvents in accordance with local regulations.
- Do not throw the Ultra Jag in regular household waste if it is damaged; check for local hazardous waste disposal guidelines.

## **Contact Information for Further Support**

For any inquiries or concerns regarding the Tipton Ultra Jag, please refer to the product packaging or visit the official Tipton website for support and additional information.

By following these safety instructions, you can ensure a safe and effective cleaning experience with your Tipton Ultra Jag. Thank you for your attention to safety.
