

# TRU VISION-ELECTRO OPTICAL RED DOT SIGHT

[Optics & Mounting](#) > [Electronic Sights](#) > [Reflex Sights](#)

The MEPRO TRU-VISION™ electro-optical MIL-SPEC red dot sight is shockproof, waterproof, and durable. Its short-length, compact, and lightweight design addresses the need for co-mounting multiple tactical devices (magnifiers, laser pointers, etc.) on your Picatinny rail. In addition, the MEPRO TRU-VISION is compatible with the Mepro MX3F/T magnifier and other popular models to facilitate engaging targets at intermediate shooting distances. Energy-efficient, it provides thousands of operating hours from a single “CR123” standard battery. The MEPRO TRU-VISION™ also features an automatic brightness control system that enables clear visibility of the red dot in any lighting condition. In addition, if the user manually controls the reticle brightness level, there are 16 brightness settings (12 daytime, 4 nighttime (NVG/NOD)), allowing the user to adjust to any lighting condition they may encounter. The large non-reflective display window (1.14” x 0.78”) and clearly defined 2 MOA red dot reticle ensure rapid target acquisition with both eyes open and unlimited field of view while remaining parallax free. Zeroing elevation and windage adjustment screws move the reticle by 0.5 MOA per click. In addition, the sight has an integrated sleep mode (after 30 minutes of no movement and when no button is pressed) and an automatic power-off mode of 4 or 8 hours (user selectable) when no button is pressed/no movement is detected. The Mepro TRU-VISION™ is equipped with a low battery indicator, a light sensor, a manual, and a soft cover in the factory packaging.

## Safety Instruction Guide

### Introduction

Thank you for choosing the MEPRO TRUVISION™ electrooptical red dot sight. This guide provides essential safety instructions to ensure the safe use of your product. Please read this manual carefully before using the sight to understand its features and safety precautions.

### General Safety Guidelines

- Ensure the product is used only for its intended purpose.
- Always handle the red dot sight with care to avoid physical damage.
- Keep the product out of reach of children and vulnerable individuals.
- Regularly check for any signs of wear or damage before use.
- Report any unsafe products or accidents to the appropriate authorities.
- Stay informed about product recalls and safety updates through the EU's Safety Gate platform.

### Specific Safety Precautions for Use

- **Battery Safety:**
  - Use only the specified CR123 battery. Using incompatible batteries may result in malfunction or damage.
  - Do not attempt to recharge nonrechargeable batteries.
  - Dispose of used batteries properly in accordance with local regulations.
- **Environmental Conditions:**
  - Avoid exposing the sight to extreme temperatures or harsh environmental conditions, which may affect performance.
  - Ensure that the sight is waterproof and shockproof as intended; however, do not submerge it in water for extended periods.
- **Eye Safety:**
  - Always use the sight with both eyes open for maximum situational awareness.
  - Do not look directly at the sun through the sight, as it may cause permanent eye damage.
- **Reticle Brightness:**
  - Adjust the reticle brightness according to your environment to ensure optimal visibility.
  - Use caution when adjusting brightness settings, especially in lowlight conditions.

### Instructions for Installation and Usage

- **Installation:**
  - Ensure the firearm is unloaded before installing the sight.
  - Securely mount the sight on the Picatinny rail, following the manufacturer's instructions.
  - Tighten the mounting screws to ensure the sight is stable and secure.
- **Powering On/Off:**
  - To turn on the sight, press the designated power button.
  - The sight will automatically turn off after a period of inactivity (4 or 8 hours, user selectable).
- **Adjusting the Reticle:**
  - Use the elevation and windage adjustment screws to zero the reticle. Each click moves the reticle by 0.5 MOA.
- **Brightness Control:**
  - Utilize the automatic brightness control for optimal visibility.
  - If manually adjusting, select from the available 16 brightness settings (12 daytime, 4 nighttime).
- **Sleep Mode:**

- The sight features an integrated sleep mode that activates after 30 minutes of inactivity.

## **Disposal Instructions**

- Dispose of the product and its components in accordance with local waste disposal regulations.
- Do not dispose of the sight or batteries in regular household waste.
- Consider recycling options for electronic devices and batteries.

## **Contact Information for Further Support**

For any questions or concerns regarding the MEPRO TRUVISION™ red dot sight, please refer to the manufacturer's contact information provided in the packaging. Ensure that you have the product details ready for any inquiries.

Thank you for your attention to these safety instructions. Enjoy the benefits of your MEPRO TRUVISION™ electrooptical red dot sight while ensuring safe and responsible use.
