

# Full Length Die 7/8 - Full Length Die 6mm Dasher

[Reloading](#) > [Reloading Dies](#) > [Rifle Dies](#)

The FL dies is used to size the cartridge case on full length. In addition to a removable expander our FL dies have an integrated primer ejector pin. All used spindles, the expander and ejector pin can be replaced easily if necessary, with just little effort.

Calibration takes place when the cartridge case is pushed into the die. The neck of the case is calibrated from the inside when it is moved out of the die. This will form the cartridge case and achieves a correct neck tension.

The correct position of the die in the press is set with the lock nut. All relevant components have an article number for easy reordering if necessary. You will find further instructions and assistance in selecting accessories and spare parts in the manual.

# Full Length Die Safety Instruction Guide

## Introduction

Thank you for choosing the Full Length Die 7/8 and Full Length Die 6mm Dasher. This guide provides essential safety instructions to ensure the safe use of the product in compliance with the EU General Product Safety Regulation (GPSR). Please read this guide carefully before using the die.

## General Safety Guidelines

- Ensure safe use of the die by following all instructions provided in this guide.
- Be aware of potential hazards associated with the use of reloading equipment.
- Store the die in a safe, dry place when not in use to prevent damage or injury.
- Regularly inspect the die for wear and tear. Replace any worn components immediately.
- Keep the die and all related tools out of reach of children and vulnerable individuals.
- Report any unsafe products or accidents to the relevant authorities.

## Specific Safety Precautions for Use

- Always wear appropriate safety gear, including safety glasses and gloves, when using the die.
- Use the die only for its intended purpose of sizing cartridge cases. Do not attempt to modify or repurpose it.
- Ensure that the die is securely mounted in the press before use to prevent accidents.
- Do not exceed the recommended load specifications for the die.
- Follow all manufacturer instructions regarding the calibration process.
- Be cautious when handling the expander and primer ejector pin to avoid injury.

## Instructions for Installation and Usage

### 1. Installation

- Ensure that your reloading press is clean and free from debris.
- Securely attach the Full Length Die to the reloading press using the provided lock nut. Ensure it is tightly fastened.
- Confirm that the die is positioned correctly and is level with the press.

### 2. Calibration

- Insert the cartridge case into the die.
- Push the cartridge case into the die to begin the calibration process.
- The neck of the case will be calibrated from the inside as it is removed from the die.

### 3. Using the Die

- After calibration, remove the cartridge case from the die.
- Check the neck tension and ensure it meets the required specifications.
- If necessary, replace the expander or primer ejector pin with minimal effort.

### 4. PostUse Care

- Clean the die after each use to prevent residue buildup.
- Store the die in a protective case to avoid damage.

## **Disposal Instructions**

- Dispose of the die in accordance with local regulations regarding metal and equipment waste.
- Do not dispose of the die in regular household waste.
- If the die is damaged beyond repair, contact your local waste management facility for guidance on safe disposal.

## **Contact Information for Further Support**

For any questions or concerns regarding the Full Length Die, please refer to the manufacturer's manual or contact the appropriate support channels as indicated in the product documentation.

Thank you for prioritizing safety while using the Full Length Die. Following these guidelines will help ensure a safe and effective reloading experience.
