

# Full Length Die 7/8 - Full Length Die 7x64

[Reloading](#) > [Reloading Dies](#) > [Rifle Dies](#)

The FL dies is used to size the cartridge case on full length. In addition to a removable expander our FL dies have an integrated primer ejector pin. All used spindles, the expander and ejector pin can be replaced easily if necessary, with just little effort.

Calibration takes place when the cartridge case is pushed into the die. The neck of the case is calibrated from the inside when it is moved out of the die. This will form the cartridge case and achieves a correct neck tension.

The correct position of the die in the press is set with the lock nut. All relevant components have an article number for easy reordering if necessary. You will find further instructions and assistance in selecting accessories and spare parts in the manual.

# Full Length Die 7/8 Safety Instruction Guide

## Introduction

Thank you for choosing the Full Length Die 7/8 for your reloading needs. This guide provides essential safety information and instructions to ensure safe and effective use of the product in compliance with the EU General Product Safety Regulation (GPSR). Please read this guide thoroughly before using the die.

## General Safety Guidelines

- Ensure that the die is used only for its intended purpose, which is to size cartridge cases.
- Always wear appropriate safety gear, such as safety glasses and gloves, when handling reloading equipment.
- Keep the die and all reloading components out of reach of children and vulnerable individuals.
- Regularly inspect the die for any signs of wear or damage. Replace any worn components immediately.
- Be aware of the potential hazards associated with reloading, including the handling of primers and gunpowder.
- Follow all local laws and regulations regarding ammunition reloading and safety practices.

## Specific Safety Precautions for Use

- Read and understand the instructions provided in this guide before using the Full Length Die 7/8.
- Ensure the die is securely fastened in the reloading press using the lock nut to prevent movement during operation.
- When calibrating the cartridge case, ensure that it is fully seated in the die before applying force.
- Do not exceed the recommended load specifications for the cartridge being reloaded.
- Always check for proper neck tension after sizing the cartridge case to ensure safe chambering.
- Avoid distractions while operating the reloading press and die to maintain focus on the task at hand.

## Instructions for Installation and Usage

### 1. Installation:

- Remove the die from its packaging and check for any visible damage.
- Insert the die into the reloading press and secure it using the lock nut.
- Ensure that the die is aligned properly and tightened to prevent any movement during use.

### 2. Usage:

- Prepare your cartridge cases by cleaning and inspecting them for defects.
- Insert the cartridge case into the die and apply pressure using the reloading press handle.
- The die will size the cartridge case and calibrate the neck from the inside as it is pushed out.
- After sizing, remove the cartridge case from the die and check for proper neck tension.
- If necessary, replace the expander and ejector pin as outlined in the manual.

## Disposal Instructions

- Dispose of any worn or damaged components in accordance with local regulations.
- Do not dispose of reloading materials, such as primers or gunpowder, in regular waste. Follow local hazardous waste disposal guidelines.
- Recycle packaging materials where possible.

## **Contact Information for Further Support**

For any inquiries regarding safety or product support, please refer to the contact information provided in the product manual or packaging.

Thank you for your attention to these safety instructions. Your adherence to these guidelines will help ensure a safe and enjoyable reloading experience with the Full Length Die 7/8.
