

# Replacement Parts - Replacement Impeller (all Kestrel Meters)

[Gunsmith Tools](#) > [Measuring Tools](#)

Ensure your Kestrel device is always ready for accurate wind or airflow measurements with the high-quality Kestrel replacement impeller. Each impeller is individually calibrated in a NIST-certified wind tunnel and comes with its own certificate of conformity.

Features:

Easy to use: Impeller replacement is quick and tool-free—simply press in the new impeller, and the old one is simultaneously ejected. Compatibility: Works with all Kestrel devices, regardless of age, restoring factory calibration. Precision: Guarantees accurate measurements of wind speed and airflow.

# Replacement Impeller Safety Instructions

## Introduction

Thank you for choosing the Kestrel Replacement Impeller for your Kestrel device. This guide provides important safety information, installation instructions, and usage tips to ensure your device operates safely and effectively. Please read this manual carefully and keep it for future reference.

## General Safety Guidelines

- Ensure that the replacement impeller is compatible with your specific Kestrel device model.
- Always handle the impeller with care to avoid damage to the product or injury.
- Keep the impeller and all packaging materials out of reach of children to prevent choking hazards.
- Regularly check for any signs of wear or damage to the impeller before use.
- If you notice any irregularities in performance or physical condition, discontinue use immediately and consult a professional.

## Specific Safety Precautions for Use

- Use the replacement impeller only for its intended purpose, which is to measure wind speed and airflow.
- Do not attempt to modify or repair the impeller; doing so may void the warranty and compromise safety.
- Avoid exposing the impeller to extreme temperatures, moisture, or corrosive substances.
- Ensure that the impeller is securely installed before using your Kestrel device to prevent it from detaching during operation.
- Be aware of your surroundings while using the device to avoid accidents.

## Instructions for Installation and Usage

### 1. Preparation:

- Gather your Kestrel device and the new replacement impeller.
- Ensure that you are in a clean and dry environment to prevent contamination.

### 2. Installation:

- Locate the impeller compartment on your Kestrel device.
- Press the new impeller gently into the compartment. The old impeller will be ejected automatically.
- Ensure the new impeller is seated properly and is secure in place.

### 3. Usage:

- Turn on your Kestrel device according to the manufacturer's instructions.
- Calibrate your device if necessary, following the instructions provided in your Kestrel user manual.
- Begin taking measurements of wind speed or airflow as needed.

### 4. PostUse Care:

- After use, clean the impeller and the device as per the manufacturer's recommendations.
- Store the device in a safe, dry place when not in use.

## Disposal Instructions

- Dispose of the old impeller and any packaging materials responsibly, following local regulations for electronic waste and plastics.

- Do not dispose of the impeller in regular household waste. Check local guidelines for proper disposal methods.

## **Contact Information for Further Support**

For any inquiries regarding safety, usage, or support, please refer to the contact information provided by the manufacturer or your point of purchase.

Thank you for following these safety instructions. Your attention to safety ensures that you can enjoy accurate measurements with your Kestrel device for years to come.
